**TECHNICAL STATEMENT**

This Technical Statement and attached exhibits were prepared on behalf of Cumulus Licensing LLC ("Cumulus"), permittee of a New FM station on Channel 245C2 at Effingham, Kansas (BMPH-20070119ADF). Cumulus is proposing to modify its outstanding permit to relocate the station and downgrade to Class A. As noted on Exhibit A, the proposed channel meets the Commission's minimum distance separation requirements to all full service licensed, proposed, or applied for facilities.<sup>1</sup> This change is needed to allow Cumulus to construct the facility before the expiration of the underlying permit. Due to the need for tower construction at the present CP site and the remaining time on the permit, it is feared that the construction could not be completed before the expiration of the permit.

Cumulus is proposing to implement this change at an existing location on an existing tower. The tower on which the antenna is to be installed has been registered with the Commission and assigned Antenna Structure Registration Number 1032676. As noted on Exhibit B, the proposed Effingham facility does not have contour overlap with any other

---

1) It is noted that this instant modification is mutually exclusive with the Effingham, Kansas permit.

Cumulus facility, nor is the station licensed to or considered “home” in any rated market. As such, this proposal is in compliance with the Commission’s multiple ownership rules.

All other necessary documentation used to certify the technical portion of FCC Form 301 has been forwarded to Cumulus and is available to the Commission upon request.<sup>2</sup>

---

2) The undersigned has evaluated only the radio frequency radiation exposure portion of the environmental review.
