

STA Extension Request for WWLF-FM, Oswego, NY
WOLF Radio, Inc.
October, 2015

WOLF Radio, Inc. ("WRI") is the licensee of WWLF-FM, Oswego, NY. WRI requests to continue STA operation with the same temporary facilities as granted in BSTA-20120206ADN and extended in BESTA-20150323AAJ which are as follows:

Frequency: 96.7 MHz (channel 244A)

Coordinates (NAD27): 43-28-36 N, 76-16-44 W

ERP: 1.4 kW (non-directional)

Antenna: ERI - Model: LPX-1E (1-bay circularly polarized)

Ground Elevation: 111 m. AMSL

Radiation Center Above Ground: 103.6 m.

Radiation Center Above Mean Sea Level: 214.6 m.

HAAT: 104 m.

WRI has construction permit BPH-20130916AAH which expires 9/24/2016 to build a new tower and transmitter building to replace the previous tower that was completely destroyed by high winds. It was expected to have completed the project by the time for filing this extension request, but the permittee has had to expend time and resources for other technical issues. Therefore, it is respectfully requested that an extension of the STA be granted. The applicant apologizes for its oversight in not timely filing this request.
