

**Exhibit 10 Spurious Measurements KPRI BMPH20070914ABO**  
**and KLQV BPH20070927AKQ**

Measurements were made using a Tektronix 2712 spectrum analyzer, SN B022394. The device was coupled to an external non-active antenna. Within the range of this device (9KHz –1.8 GHz) no spurious products or harmonics or other products of either KPRI or KLQV were observed above the noise floor of the unit. The facilities comply with 73.317 (d).
