Re: ***In the Matter of Gary M. Cocola, Licensee of FM Translator, K259CF, South Fresno, California (Facility ID No. 144742)***
Interference Complaint

Dear Ms. Dortch:

On behalf of Bott Communications, Inc. ("Bott"), licensee of full-power FM broadcast station, KCIV, Mount Bullion, California (Facility ID No. 6504) (Channel 260/99.9 MHz) ("KCIV"), transmitted herewith is one (1) original and four (4) copies of Bott's Interference Complaint against FM translator, K259CF, South Fresno, California (Facility ID No. 144742), licensed to Gary M. Cocola. Mr. Cocola's operation of K259CF on KCIV's first-adjacent channel (i.e., Channel 259/99.7 MHz) is causing interference to the regular listeners' reception of KCIV.

Should you have any questions regarding this transmittal, please contact the undersigned.

Respectfully submitted,

Kathleen Victory

Licensee of FM Translator, K259CF, South Fresno, California	)	

To: Chief, Audio Division, Media Bureau

INTERFERENCE COMPLAINT

Bott Communications, Inc. ("Bott"), licensee of full-power FM broadcast station, KCIV, Mount Bullion, California (Facility ID No. 6504) (Channel 260/99.9 MHz) ("KCIV"), by its undersigned counsel and pursuant to Section 74.1203 of the Commission's rules,[1] hereby submits this complaint of interference against FM translator, K259CF, South Fresno, California (Facility ID No. 144742) ("K259CF"), licensed to Gary M. Cocola. Mr. Cocola's operation of K259CF on KCIV's first-adjacent channel (i.e., Channel 259/99.7 MHz) is causing interference to the regular listeners' reception of KCIV. Accordingly, Bott requests that the Commission order K259CF to cease operations immediately.

I. BACKGROUND

A. Actual Interference by FM Translators

Section 74.1203(a)(3) provides, in pertinent part, that an FM translator station "will not be permitted to *continue to operate* if it causes any actual interference to . . . the direct reception by the public of the off-the-air signals of *any* authorized broadcast station . . . ."[2] The Commission interprets this rule very broadly as it "places no geographic or temporal limitation on

---

1 47 C.F.R. § 74.1203 *et seq.*

2 *Id.* at § 74.1203(a)(3) (emphasis added).

complaints . . . ."[3] The FCC's FM translator rules strictly prohibit interference caused by the operations of FM translator stations due to their secondary nature, and that translators provide interference-free service.[4]

Contacts were made to both Cocola's counsel and his consulting engineer to advise them of the interference to KCIV by K259CF's operations, and to request that the interference cease. To the best of Bott's knowledge, no action has been taken by Cocola to ameliorate, much less alleviate, the interference caused by K259CF to KCIV's listeners. The interference has not been eliminated. Accordingly, based upon the showing below and pursuant to Section 74.1203(b) of the Commission's rules, the FCC must order the offending translator to cease operations.[5]

B. *Bona Fide* Listener Complainants

The Commission interprets the "direct reception to the public" language in Section 74.1203(a) to mean that actionable interference complaints must be made by "*bona fide*" listeners.[6] In order for a listener complainant to be *bona fide*, the FCC's staff requires each listener complainant to provide: (1) his or her name and address; (2) the location(s) at which the interference with the desired station occurs; and (3) a statement that the listener is, in fact, a listener

4 *See Forus FM Broadcasting of New York, Inc.*, 7 FCC Rcd. at 7882, ¶ 12 (discussing FM booster stations, also a secondary service).

5 47 C.F.R. § 74.1203(b).

6 *Association for Community Education, Inc.*, 19 FCC Rcd. at 12688, ¶ 16 ("[O]nly a complaint from a *bona fide* listener of the desired station can force a translator station of the air."). Although the Commission historically has not required a minimum number of listener complaints to support an interference complaint, in the *FM Translator Interference NPRM*, the FCC proposed requiring a minimum of six (6) listener complaints to be submitted with an FM translator interference complaint. *See Amendment of Part 74 of the Commission's Rules Regarding FM Translator Interference*, MB Docket No. 18-119, Notice of Proposed Rulemaking, FCC 18-60 ¶ 16 (rel. May 10, 2018) ("*FM Translator Interference NPRM*").

of the desired station.[7] Furthermore, a listener complainant must be disinterested, i.e., have no legal, economic, or familial stake in the outcome of the proceeding.[8]

II. DISCUSSION

As evidenced by the listener complaints attached hereto as **Exhibit A**,[9] KCIV's listeners are having difficulties tuning to KCIV throughout the Fresno, California metropolitan area. Instead of receiving KCIV's signal, these listeners attest that beginning sometime around April or May 2018 they began hearing classic rock music broadcast by "KKDJ FM, 99.7" (i.e. K259CF)[10] when attempting to tune-in to KCIV on 99.9 MHz. Furthermore, as demonstrated by the Engineering Statement of Jeremy D. Ruck, PE, attached hereto as **Exhibit B**, the listener complainants are at locations within KCIV's regularly utilized service area. Bott has attempted to work with Mr. Cocola to find a solution to remediate the interference to KCIV's signal caused by

[7] *See Creation of an LPFM Service*, Fifth Order on Reconsideration and Sixth Report and Order, 27 FCC Rcd. 15402, 15431-32, ¶ 83 (2012).

[8] *See Association for Community Education, Inc.*, 19 FCC Rcd. at 12688, n.37; *Creation of a Lower Power Radio Service*, Fifth Report and Order, 27 FCC Rcd. 15402, 15441, ¶ 109 (2012). Although not traditionally required, the Commission proposed in the *FM Translator Interference NPRM* that listener complainants must provide a signed declaration attesting to their *bona fide* listener complainant status. *FM Translator Interference NPRM* ¶ 19. Furthermore, the FCC proposed requiring stations submitting a translator interference claim pursuant to Section 74.1203(a)(3) to include a map plotting specific listener complainant addresses in relation to the relevant station contours. *Id.*

[9] Nineteen signed and five unsigned listener complainant declarations are provided in **Exhibit A**. Also included in **Exhibit A** are twenty-six call transcripts and two emails from listeners complaining of interference with their reception of KCIV's signal – of which seventeen are from listeners that did not provide a declaration.

[10] *See* KKDJ FM 99.7, http://kkdjradio.com/ (last visited Jul. 13, 2018) ("KKDJ IS FRESNO'S NUMBER ONE *CLASSIC ROCK STATION* THAT'S SO POWERFUL THAT WE ARE ON TWO FREQUENCIES *94.7 CENTRAL VALLEY* AND *99.7 IN FRESNO* . . . ." (emphasis added)). K259CF rebroadcasts FM station, KYAF, Firebaugh, California (Facility ID No. 9993) ("KYAF") on 99.7 MHz. *See* File Nos. BLFT-20180306AAR and BPFT-20180117ACG. KYAF operates on 94.7 MHz. *See* File No. BLED-20151223BUK.

K259CF's operations, but its attempts were unavailing. Accordingly, the FCC must order K259CF to cease operations immediately pursuant to Section 74.1203(b) of the Commission's rules.

CONCLUSION

For the foregoing reasons, Bott respectfully requests that the FCC order K259CF to cease operations immediately pursuant to Section 74.1203(b) of the Commission's rules.

Respectfully submitted,

WHEN DID YOU NOTICE INTERFERENCE ON KCIV, 99.9 MHz (DATE) 6/25/2018

STATE WHERE YOU USED TO HEAR KCIV, 99.9 MHz, AND CANNOT HEAR THE FULL SIGNAL NOW WITHOUT INTERFERENCE California

COMMENTS I Noticed the interference many months ago, but I didn't know that anything could be done about it. The interference extends for many miles, in the form of static. In the vicinity of Blackstone and Shaw/Gettysburg, the interference is so strong, that I can sing along with the music the other channel is playing.

On 6/25/2018, at 11:55am, I was in my work vehicle at Blackstone and Gettysburg. My radio was tuned to 99.9fm, but I was picking up 99.7fm, instead. They were playing "Turn Around Bright Eyes" By Heart. Then "Who Are You?" By The Who.

Later in the evening on 6/25/2018, at 9:15pm, I was at Blackstone and Shaw, in my personal vehicle, my radio was tuned to 99.9fm, but again, all I could hear was 99.7fm. A Baseball game was playing. The Fresno Grizzlies were playing the El Paso Chihuahuas at Chukchansi Park.

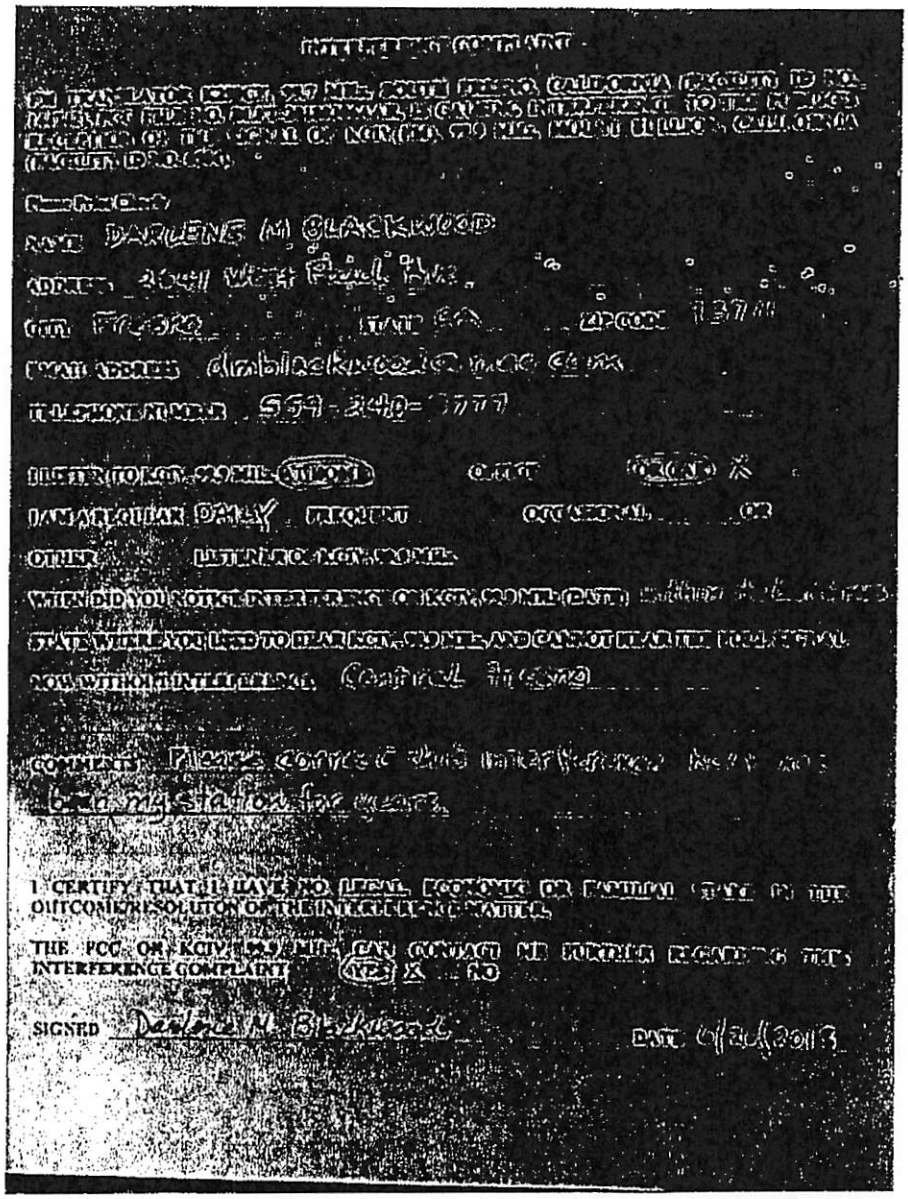
I live in this area, near Fresno St. and Gettysburg. I would love to be able to listen to 99.9fm at home, but I'm not able. I sure hope this can be fixed.

INTERFERENCE COMPLAINT

I CERTIFY THAT I HAVE NO LEGAL, ECONOMIC OR FAMILIAL STAKE IN THE OUTCOME/RESOLUTON OF THE INTERFERENCE MATTER.

THE FCC OR KCIV, 99.9 MHz, CAN CONTACT ME FURTHER REGARDING THIS INTERFERENCE COMPLAINT YES X NO

SIGNED Sarah Eld DATE 6/26/2018



• Grace and peace to you from God our Father and the Lord Jesus Christ.

WHEN DID YOU NOTICE INTERFERENCE ON KCIV, 99.9 MHz (DATE) December

STATE WHERE YOU USED TO HEAR KCIV, 99.9 MHz, AND CANNOT HEAR THE FULL SIGNAL NOW WITHOUT INTERFERENCE In the car, when I go down south into central Fresno, it is the worst. See note below.

COMMENTS I apologize for not sending form in. I could not fill it out on my phone as I believed. I do not have capability for electronic signatures. I couldn't print it out also. I can say that I went where the transmitter is located in Fresno. You're right, it's a classic rock station located by/in a building housing a business that has been located there for years called Bentley's Drums (percussion instruments). Transmitter is located just in back of building next to a ponding basin on southwest corner of Indianapolis and Blackstone Ave. Again. So sorry couldn't get form to you via email. Thank you for taking the time to resolve the interference situation. It truly is not only annoying but disrespectful. Thank you and God bless you and BRN for all your wonderful Christian and the Great Commission programming.

Humbly and gratefully yours,

Gloria Verdugo.

EMAIL ADDRESS gourmet4jc@yahoo.com

TELEPHONE NUMBER (559) 447-8448

I LISTEN TO KCIV, 99.9 MHz, AT HOME day & nite OFFICE _____ OR CAR me and my husband.

I AM A REGULAR almost 24/7 FREQUENT _____ OCCASIONAL _____ OR

OTHER _____ LISTENER OF KCIV, 99.9 MHz.

WHEN DID YOU NOTICE INTERFERENCE ON KCIV, 99.9 MHz (DATE) several weeks or months ago (unsure of exact date). Came on very unexpectedly after years of clear broadcasts.

STATE WHERE YOU USED TO HEAR KCIV, 99.9 MHz, AND CANNOT HEAR THE FULL SIGNAL

NOW WITHOUT INTERFERENCE: Could hear KCIV clearly since we began listening in the beginning of your broadcasting. Could hear clearly in home and in both our cars. All over Fresno, north on Highway 99 going towards Modesto and the San Francisco Bay area. Also going south toward Visalia and not quite as far as Bakersfield. Up until a short time ago, we could hear the programming clearly until we got out of range. Any section of that area, any and every part of town. My husband used to listen every day on his way to and from work from our home in Northwest Fresno down to Fresno City Hall in downtown Fresno. Everywhere in Fresno KCIV was clear as a bell with no static and no bleeding over from another station as it does now. The closest station that blocks out KCIV seems to be a station at 99.7 which totally blocks it, leaving us with nothing but noisy static. Everywhere we drive with our digital car radios. We can't get away from the bleed from 99.7.

INTERFERENCE COMPLAINT

COMMENTS This has become a very difficult situation, since we can no longer hear our station at all in our cars which have digital radios, of course. We cannot listen to KCIV at all on our car radios. We depend on KCIV for Christian programming of all kinds, news, commentaries, etc. It's a part of our lives. Please remove that interference as soon as possible. Thank you. We understand that any interfering station must be removed from interfering with an already established station like KCIV.

I CERTIFY THAT I HAVE NO LEGAL, ECONOMIC OR FAMILIAL STAKE IN THE OUTCOME/RESOLUTON OF THE INTERFERENCE MATTER.

THE FCC OR KCIV, 99.9 MHz, CAN CONTACT ME FURTHER REGARDING THIS INTERFERENCE COMPLAINT YES X NO _____

SIGNED Mr. and Mrs. Leon and Dianne Molina

DATE June 23, 2018

Re: Modesto 99.9 interference

Wednesday, June 20, 2018 10:02 AM I'm in Fresno, and I can't hear 99.9 in my kitchen. The interference is a relatively new station, and it's music mainly. My name is Betty Pike, and my number is 559-299-2201. I can kind of get it in my bedroom.

Wednesday, June 20, 2018 3:09 PM This is Dianne Molina from Fresno, California. I have been very much annoyed by the interference. I've had to just turn off KCIV, because I haven't been able to hear. The interference is horrible. My guess is that it's 99.7 which is a new station. It's been very disturbing, so thank you for taking care of it. 1-559-447-8448.

Wednesday, June 20, 2018 8:01 PM This is Rich, and I'm a listener in Fresno. I'm getting the interference, and I believe it's from 99.7. Since they came on the air, the interference has gotten worse. My number is 559-307-1179.

Wednesday, June 20, 2018 8:02 PM My name is Charlie, and I'm calling from Fresno, California. I just heard your message about possible interference on your 99.9 Modesto channel. It's 99.7, a rock and roll station. When you are in the heart of Fresno, especially in the area of Ashland and Fresno Street, and at least a mile in all directions, you can't get anything. I did change the antenna on my vehicle, and have a slight improvement, but it's still a problem. My number is 559-240-4746.

Wednesday, June 20, 2018 8:13 PM My name is Tara Shaw, and my number is 559-486-2677. Listen to 99.9 FM radio in Fresno, California. The interference is coming from a station on 99.7. It's usually much worse at night.

Thursday, June 21, 2018 9:02 AM I listen to Bott Radio. I'm off of Abby and Olive, 1646 East Hammond. It barely comes in. 1-559-412-1234.

Thursday, June 21, 2018 12:30 PM My name is Matt, and I live in Fresno, California. I listen to KCIV for over 20 years. In the last couple of years it seems to have begun to deteriorate; the quality of the signal. The primary one that I find is 99.7. It's extraordinarily loud around the downtown Fresno area. 1-559-906-0795.

Thursday, June 21, 2018 12:43 PM I'm a Fresno listener whose listening habits have been interrupted by a great deal of static, and other radio stations creeping in. My name is Dave, and my number is 559-225-7846.

Friday, June 22, 2018 1:11 PM I live in Fresno, and the radio station I listen to is 99.9, Bott Radio. A lot of the interference that has been happening, I actually jotted these frequencies down. 99.7 comes in pretty strong at times. At other times 100.3 and100.5 will interfere during the evening hours. It changes. My name is Joshua, and my phone number is 559-725-0786.

Friday, June 22, 2018 3:21 PM My name is Joaquin Magana, and I listen to Bott Radio here in Fresno. I experience interference, out here in my house and when I jump on the freeway on the way to work. My number is 559-779-4796.

Friday, June 22, 2018 4:18 PM I'm calling in the Fresno, California area being affected by radio signal. I'm in 93710 zip code area. My name is Rudy. Please call me if you need more information. My number is 650-283-5208.

Friday, June 22, 2018 9:31 PM I'm always listening to 99.9 in Fresno, and we are having problems, a lot of static sometimes. TUMOINE ROSE (15593015851)

Friday, June 22, 2018 9:32 PM My name is LaDonna Strid, and you said to call if we are receiving interference. I'm in Fresno listening to 99.9. I was traveling east on Shaw when I crossed Blackstone. I started getting the Fresno Grizzly game. Then when I turned north on First, there was a lot of interference and snow and stuff. It was about 7:22 pm, but I couldn't tell you what station. 559-474-9970.

Friday, June 22, 2018 9:32 PM My name is Robert Espinoza, and I listen to Bott Radio. I'm calling about the interference. The interference I pick up is between Highway 168 going westbound on Shaw, all the way to 99th on Shaw. Then north to about Herndon Avenue, and south to about Shields Avenue, at least. The more west you go, the worse it is. My number is 559-308-6530. Feel free to call if you need anymore information.

Saturday, June 23, 2018 6:07 AM I'm in Fresno, listening to Bott. I just came off south bound 41 Freeway turning on to Divisadero, by the Fresno Community Hospital. It doesn't seem to be drowning out, per se, but it's static, like the signal is pretty wonky. It's not clear as it otherwise would be. 559-903-4131.

Sunday, June 24, 2018 10:31 PM My name is Paul, I live in Fresno, and I'm responding to the Bott Radio signal trouble. The station in question is KKDJ, 99.7. They have been advertising that they are fine tuning their signal, but they have kind of squeezed over into 99.9 quite a bit. SNASHALL PAUL (15593125512)

Monday, June 25, 2018 10:17 AM I'm from Fresno, California, and I was listening to Bott Radio network on 99.9. I am having a problem, because 99.7 seems to be bleeding into 99.9. So if you need to reach me, you can call me back at 559-222-3894.

Monday, June 25, 2018 11:01 AM This is Linda Jensen. I talked to you the other day about the interference on 99.9 here in Fresno. On the way to church at 10:19 I noticed there was quite a bit of interference for about 5 minutes. It seemed like it might have been coming from 99.7. You can contact me on my landline at 559-277-1611, or on my cell 559-960-6638.

Monday, June 25, 2018 12:57 PM This is Ed Petemeyer calling in response to the radio interference situation. The interference is coming from 99.7, the classic rock station. It seems to be affecting Fresno from just below Herndon and 41 to about Sierra and 41. North of Herndon, and south of Sierra, you are crystal clear again. My number is 559-269-6941.

Monday, June 25, 2018 6:47 PM My name is Darlene Blackwood, my phone number is 559-240-8777, and I am calling from Fresno. I've been very frustrated with the interference of 99.9 when I get into the center of town, especially north. Around the outskirts it's not so bad.

Monday, June 25, 2018 8:43 PM My name is Allen, and I'm a listener of 99.9 FM KCIV Bott Radio Network. I do live in Fresno, and yes, there is a significant interference from a neighboring program, and their call letters are KKDJ at 99.7 FM. So they are bleeding through significantly, and interfering with the Bott Radio programming. If you need to call me, my phone number is 559-367-2338.

Tuesday, June 26, 2018 12:42 PM There is an area in Fresno, downtown, that I get a lot of static and interference on your radio station. HARDING RAYMOND (15598342137)

Tuesday, June 26, 2018 1:56 PM This is Barbara Harden. My email address is: barb2entropy@unwiredbb.com I don't even have to go into the center of town. When I go 2 miles west of me, which is heading toward the north part of town, I lose you, so it's more than just the center of town, although it's much worse in town. CLOVIS CA (15593921219)

Tuesday, June 26, 2018 8:00 PM I'm listening to 99.9 FM station regarding the interference. I'm calling from Fresno and the interference that I experienced is on the 41 freeway south and north. The stretch is I would say from Ashland Avenue to until almost Herndon. Southbound and northbound as well.

Wednesday, June 27, 2018 9:53 AM This is Greg Stephens, and I listen to Bott Network, at least I try to. If you're traveling down 41, it starts to go off around --- avenue, then kicks back on around 180. It's pretty annoying it goes off all the time. It's off around Fashion Fair area. STEPHENS GREGOR (15594487522)

Thursday, June 28, 2018 11:13 AM I live in the Fresno area, and there is interference on 99.9. There's a Spanish station and a rock station that is really loud and overpowers your station. 559-765-1776.

Listener's Best Station: KCIV 99.9 FM (Fresno / Modesto, CA)
Message:
Hello. I have not been able to listen anymore to KCIV 99.9 in Fresno, CA. A station called KKDJ has taken over your signal around Fresno. So when you are trying to listen to David Jeremiah or another Bible teacher you mostly get rock and roll kind of scrambled in at 99.9. Sorry to not hear your broadcasts anymore. I was listening for over ten years. Signal has been all screwed up for at least two months or more. Thanks

Tuesday, July 17, 2018 (received via email)

Subject: Re: Bott Radio Network interference form

I tried to print out the form and it wouldn't print. I am still having interference with other stations overriding 99.9 Fresno, CA channel. I move the radio to different locations and it still doesn't come in clear. I hear it but its fuzzy. Strangely I have to go to move the channel past the 99.9 setting to hear anything but it has static. It comes in fine in the car but I rarely am in a car. I listen every day or I did at home. It has been **several** months. One day I came home and I had left the radio on 99.9 and there was rock music playing.
I miss listening to you. Christine Pappas 356 W. Bullard Fresno, CA 93704

Exhibit B

Engineering Statement of Jeremy D. Ruck, PE

EXHIBIT B
ENGINEERING STATEMENT

The following engineering statement and attached exhibits have been prepared for **Bott Communications, Inc.** ("Bott"), licensee of FM broadcast station, KCIV, Mount Bullion, California (Facility ID No. 6504), and illustrate station coverage and listener complaint data relative to the Bott interference complaint ("Interference Complaint") against FM Translator, K259CF, South Fresno, California (Facility ID No. 144742), to which this statement is attached.

KCIV is a full-power FM station, that was first authorized by the Commission in 1987, and licensed in 1990.[1] Thus for nearly thirty years, KCIV has been providing service to residents of the Central Valley of California, including the Fresno, California metropolitan area. It is respectfully submitted that the service to the residents of that region is well documented given the interference complaints that have been submitted, and are attached to the Interference Complaint as Exhibit A ("Listener Complaints").

Typically, the Commission relies on the use of its standard contour protection method. However, due to the rough and atypical terrain in the region, the standard method tends to fall apart, and is not an accurate representation of the usable coverage of the facility. Exhibits B-1 and B-2 illustrate the predicted 70, 60, and 54 dBu FCC F(50,50) service contours overlaid on the Longley-Rice coverage at the same field strength breakpoints.

[1] *See* FCC File Nos. BPH-19850313MC, BMPH-19890113JJ, and BLH-19890601KD.

By inspection it can be noted that the Longley-Rice based coverage predictions vary from the FCC standard method by at least 10%. This therefore leads to the reasonable inference that the terrain along numerous azimuths, especially those in the direction of the Fresno metro area, vary widely from the national average upon which the FCC propagation calculations were based. As a result, the FCC contours upon which the licensee of K259CF based their interference study pursuant to Section 74.1204 of the Commission's rules do not adequately represent the actual situation. Indeed, the empirical evidence attached to this statement in the form of listener complaints further confirm what is demonstrated in Exhibits B-1 and B-2. The KCIV signal level in the Fresno area is listenable and regularly usable despite what the contour values may indicate.

Interference is defined to occur in situations where a specific ratio between the field strength of a desired and undesired signal exists. Translator K259CF is authorized on a channel first adjacent to that of the KCIV license. As a result, interference to the latter is predicted to occur in areas where the field strength of the translator is less than 6 dB below the field strength of KCIV. Exhibit B-3 illustrates these regions based on the Longley-Rice model, along with tokens for fixed locations for which complaints were filed with Bott. The following table summarizes these locations, including the surname of the complainant, their physical address, and the NAD83 geographic coordinates of the address derived from satellite imagery.

ID	Complainant	Physical Address	NAD83 Coordinates
RES1	Molina	2080 W. Palo Alto, Fresno	36-50-01 N 119-49-41 W
RES2	Jensen	6489 N. Constance, Fresno	36-49-53 N 119-53-11 W
RES3	Harding	1006 E. Gleason, Fowler	36-38-08 N 119-39-59 W
RES4	Kuder	950 Woodworth, Clovis	36-49-07 N 119-42-14 W
RES5	Shaw	3171 E. Kerckhoff, Fresno	36-44-27 N 119-46-15 W
RES6	Cox	1154 W. Stuart, Fresno	36-49-33 N 119-48-43 W
BUS7	Wolfe	7089 N. Marks #105, Fresno	36-52-21 N 119-50-56 W
RES8	Yrene	285 W. Pinedale, Fresno	36-50-36 N 119-47-49 W
RES9	Medina	2670 E. Nees, Fresno	36-51-09 N 119-44-08 W
RES10	Rojas	2055 E. Shaw #G, Fresno	36-48-30 N 119-45-11 W
RES11	Combs	551 E. Wrenwood #101, Fresno	36-49-03 N 119-46-41 W
RES12	Eld	2520 E. Indianapolis, Fresno	36-47-56 N 119-46-51 W
RES13	Geiger	794 N. Orangewood, Fresno	36-45-15 N 119-42-45 W
RES14	Armstrong	6040 N. Augusta #101, Fresno	36-49-25 N 119-46-44 W
RES15	Hardy	3570 W. Cornell, Fresno	36-46-39 N 119-51-26 W
RES16	Pappas	356 W. Bullard, Fresno	36-49-23 N 119-47-52 W

As this map demonstrates, the physical locations of these listener complaints are within, or in proximity to the predicted interference area. It should be noted, however, that even the small number outside the calculated interference area does not invalidate the complaint.

In addition to the sixteen listener complaints summarized above with specific physical addresses, numerous other listener complaints have been submitted, which point to empirically observed interference from the K259CF translator to the reception of KCIV over wide swaths of the Fresno, California metropolitan area. As a result, it is respectfully submitted that K259CF is in apparent violation of Section 74.1203(a)(3) of the Commission's rules.

The preceding statement and attached exhibits have been prepared by me, or under my direction, and are true and accurate to the best of my belief and knowledge.

Fresno Metro Areas of Predicted
Interference to Reception of KCIV
KCIV - Mount Bullion, California
Bott Communications, Inc.
July, 2018

DECLARATION

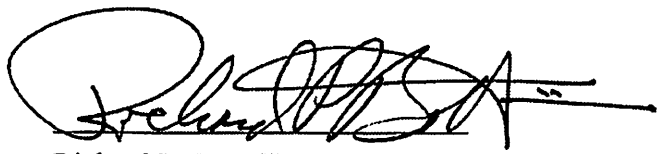
I, Richard P. Bott, II, hereby attest to the following:

1. I am the Vice President of Bott Communications, Inc.

2. I have personal knowledge of the facts set forth in the foregoing Interference Complaint.

3. I have read the Interference Complaint, and the responses therein are truthful and correct to the best of my knowledge, information, and belief.

I hereby certify that to the best of my knowledge and belief, under penalty of perjury, the foregoing statements are true and correct.



Richard P. Bott, II

Dated: July 18, 2018

CERTIFICATE OF SERVICE

I, Keenan P. Adamchak, counsel for Fletcher, Heald & Hildreth, PLC, hereby certify that I caused a true copy of the foregoing Interference Complaint to be sent this 18th day of July, 2018, via U.S. First Class Mail, postage prepaid, and via email, where indicated, to the following individuals:

Michael Couzens, Esq.*
P.O. Box 3642
