

CALVARY CHAPEL OF TWIN FALLS, Inc.

KGSF GREEN FOREST, AR / BLED- 20080512AFU
DECEMBER 2011

Request for Waiver of 47 C.F.R. Section 73.316(a)

KGSF Green Forest is on the air and has been operating under License File No.:BLED-20080512AFU with a vertically polarized PSI FMV-2-HWS-DA, 2 Section, 0.5 wavelength spaced Directional Antenna System since it was placed into operation. Calvary Chapel of Twin Falls, Inc. seeks to continue to utilize the existing vertically polarized transmit antenna in its submission of this proposed application to increase KGSF's ERP.

Replacing any transmit antenna system is costly in these financially challenged times, especially that of a directional antenna system from vertical polarization to an exact image of a horizontal or horizontal and vertical polarized system. It is especially burdensome for a noncommercial educational broadcaster since funds are always limited due to the nature of our broadcast service.

Calvary Chapel of Twin Falls, Inc. believes that its request for a waiver of 47 CFR 73.316(a), to allow a continuance to operate the existing vertically polarized directional antenna system, is in the public's best interest and is seeking a grant of its application.
