

Radio One Licenses, LLC  
WBOT, Brockton, MA  
Form 302-FM, June 2005

This is a certification that the WBOT directional antenna system authorized in Construction Permit BPH-20050215ABK was installed pursuant to instructions provided by the manufacturer, Shively Labs.

I personally witnessed the field assembly and installation of this antenna between June 28 and June 30, 2005. To the best of my knowledge and belief, the new 6810-2R-SS-DA antenna was installed in full compliance with the installation drawings and all terms of the construction permit.

The proper azimuth alignment of the support structure and antenna has been checked and verified as correct by Broadcast Tower Services. A surveyor's attestation will be included as an amendment to this application as timing has not allowed for the attestation to be prepared prior to filing.

I am currently V.P. of Engineering for Radio One Licenses, LLC. I have over 10 years experience installing and maintaining broadcast antenna systems. My other qualifications are a matter of record with the FCC.
