

**EXHIBIT 13**  
**Waiver Request of Section 74.1204**  
Lebanon, TN 10 Watts ERP  
Minor Channel Change to 287  
July 2018

The proposed site is contained entirely inside the service contour of third-adjacent FM Station WNRQ, Nashville, TN.

Please note: There will be no physical changes on the Lebanon tower. All equipment will remain as is. This is only a frequency change from channel 288 to 287 to remedy an interference issue with co-owned W288CI Nashville, TN

**WNRQ**

The proposed site is contained entirely inside the service contour of third-adjacent FM Station WNRQ, 290C, 100kW Nashville. The level of least arriving protected F(50,50) signal is 75.7 dBu and the U/D proposed interfering contour is 36.6 meters or 120.1 feet. There are residences in the area. Attached is a Google Earth aerial view of the closest structures. CCTF engineer Mickel Pruden was at this site within the past 3 weeks and the structure that is marked 144 feet is a farm shed and not a dwelling. The only other structure that is near is a grain elevator or water tank, which is round and white in the attached google earth picture

Calvary Chapel of Twin Falls, Inc. respectfully requests a waiver of the FM translator contour overlap regulations with respect to third adjacent WNRQ Nashville, TN.
