NCE FM Interference to Television Channel 6
Weatherford, Texas

The purpose of this exhibit is to show compliance with §73.525 of the Commission's Rules. The Rules require that an applicant proposing operation on FM Channel 203 must be 246 kilometers from a television Channel 6 facility. There are four affected TV 6 station.

1. KBFW-LP(Digital Flash Cut) - 73 km distant
2. KBFW-LP - 73 km distant
3. KZFW-LP - 111 km distant
4. KZFW-LD - 145 km distant

First, the relative HAAT figures were generated for the above station using the NGDC 30 Second Database and the data from the FCC TV Database. The distance to the 47 dBu contour was predicted according to the procedures specified in §73.684 of the Commission's Rules, "Prediction of Coverage," using the F(50,50) curves in Figure 9 of §73.699.

The applicant chooses to use vertically polarized transmissions only. The maximum horizontally polarized ERP permissible at the same proposed antenna height (2.5 kilowatts at 158 meters A.A.T.), calculated without the adjustment for television receiving antenna directivity, multiplied by 40 (2.5 x 40 = 100.0 kilowatts at 158 meters A.A.T.).

A table of the proposed NCE FM F(50,10) interfering contour to the 47 television channel 6 F(50,50) protected contour may be seen as Table 1 of this exhibit.

A plot of the proposed NCE-FM stations' 53.5 dBu F(50,10) interfering contour to television channel 6 47 dBu F(50,50) protected contour may be seen as Figure 1 and Figure 2 of this exhibit, note that these contours do not overlap. Therefore, it may be concluded that the proposed NCE FM station will not cause any interference to the reception of TV-6, and the application complies with §73.525 of the Commission's Rules as pertains to interference to the reception of TV Channel 6 by NCE-FM stations.
