

**August 2010  
KDNM(FM) Channel 211A  
Reserve, NM  
Statement re Contingent Application Group**

**Contingent Application Group**

By simultaneously-filed minor change applications, it is proposed to modify the authorizations for KZXQ 283A Reserve and KDNM 211A Reserve as follows:

- 1) It is proposed to modify the authorization for KZXQ from Channel 283A at Reserve, NM to Channel 283C1 at Concho, AZ;
- 2) In order to provide replacement service at Reserve, it is proposed to modify the authorization for unbuilt KDNM on Channel 211A at Reserve, to operate with increased power at its authorized antenna site.

In order to effectuate these changes, an amendment is being filed to the pending KZXQ 283C1 Cocho application (BPH-20071025ACM) simultaneous with the filing of an application to modify the KDNM construction permit.

The KZXQ licensee is Cochise Broadcasting LLC, which has identical ownership to that of the KDNM permittee, Cochise Community Radio Corporation. Thus it is axiomatic that there is an agreement between the two parties consenting to simultaneous filing and prosecution of the KZXQ and KDNM applications.
