**TECHNICAL STATEMENT**

This Technical Statement and attached exhibits were prepared on behalf of Sea-Comm, Inc. ("Sea-Comm"), licensee of station WBNE, Channel 229A, Wrightsville Beach, North Carolina. Sea-Comm also holds an outstanding construction permit to upgrade to Channel 229C3 and change community of license to Topsail Beach, North Carolina (BPH-20060228AAO). Sea-Comm herein proposes to modify the construction permit by downgrading to Channel 229A at Topsail Beach, North Carolina.

Sea-Comm is proposing to locate WBNE on an existing tower, as such, the Federal Aviation Administration was not apprised of this proposal. The tower on which WBNE is to be installed has been registered and assigned Antenna Structure Registration Number 1218146. At the proposed site, the 70 dBu contour, based on the standard FCC propagation model, does not encompass all of the community of Topsail Beach. As such, a supplemental analysis has been conducted to demonstrate this proposal complies with the city grade coverage requirements (see Exhibit A for details).

At the site proposed for WBNE, Channel 229A does not meet the Commission's spacing requirements to one other authorized facility. Therefore, processing pursuant to §73.215 is requested (see Exhibit B for details). All of the remaining exhibits used to certify the information on Form 301 have been forwarded to Sea-Comm and are available for submission to the Commission upon request.<sup>1</sup>
