From: Stuart A. Rowland, Chief Engineer, KTAL-TV  
To: Whom it may concern  
RE: ERP increase for KTXK-FM

Greetings!

On behalf of KTAL-TV, I have reviewed the technical statements of Frank Coleman, President of Texarkana College of Texarkana, TX, as supported by evidence of his consulting engineer, Don Mussell. It appears that there will be no noteworthy interference produced into our signal. Therefore, we approve of KTXK-FM's actions completely.

Should any future interference problems arise, they shall be handled on a local basis between KTAL-TV and KTXK-FM.

If there are any questions or problems in regard to this application, feel free to contact me at (318) 629-6000 x 126, or via email at [srowland@nbga.net](mailto:srowland@nbga.net).

Sincerely,

Stuart A. Rowland
