**ENGINEERING TECHNICAL STATEMENT PREPARED BY WILLIAM T. GODFREY, JR. OF THE FIRM KESSLER AND GEHMAN ASSOCIATES, INC., TELECOMMUNICATIONS CONSULTING ENGINEERS IN CONNECTION WITH A MINOR CHANGE IN LICENSED FACILITY APPLICATION TO MAKE CHANGES TO THE GEORGIA PUBLIC TELECOMMUNICATIONS COMMISSION (GPTC) LICENSE (BLED-19890911KC) FOR THE WACG-FM CHANNEL 214 C2, AUGUSTA, GEORGIA NON-COMMERCIAL EDUCATIONAL FM BROADCAST FACILITY.**

The firm Kessler and Gehman Associates, Inc., has been retained by the Georgia Public Telecommunications Commission (GPTC), Atlanta, Georgia, to prepare engineering studies and the engineering portion of a minor change in licensed facility application for the licensed WACG-FM Channel 214 C2 Non-Commercial Educational FM (NCE-FM) broadcast facility (BLED-19890911KC) requesting authorization to make changes to the following: 1) transmitter site; 2) Effective Radiated Power (ERP); 3) antenna height radiation center; and 4) polarization.

**Discussion**

GPTC is licensed to operate WACG-FM Channel 214 C2 with an ERP of 25 kW (circular polarization) at an antenna height radiation center of 83.0 meters Above Ground Level (AGL) using a nondirectional Jampro antenna which is side-mounted on a tower owned by Media General Communications Holdings. GPTC is the licensee of seventeen full-service FM stations of which, the following are collocated with GPTC full-service television stations on GPTC-owned towers: 1) WJSP-FM on WJSP-TV tower; 2) WMUM-FM on WMUM-TV tower; 3) WNGH-FM on WCLP-TV tower; 4) WSVH-FM on WVAN-TV tower; and 5) WXVS-FM on WXGA-TV tower. GPTC proposes to do the same thing with its WACG-FM facility by moving it approximately 44 km SW to its WCES-TV tower. The Media General tower is located in SC and over 50% of the WACG-FM coverage is in SC. Moving WACG-FM to the WCES-TV tower would serve the public's best interest by: 1) eliminating a huge monthly fee paid to Media General using tax dollars for leasing tower space on the Media General tower; 2) better serving the Georgia public by improving coverage in the state of Georgia; 3) saving tax dollars by

maintaining one engineer at the WCES site instead of possibly maintaining an engineer at the WCES site and another at the Media General site in SC; and 4) improving the response time if and when GPTC must send its quick reaction team to fix problems causing outages.

According to the Power and Antenna Height Requirements depicted in §73.211 of the FCC rules, the proposed ERP of 5.6 kW would classify the proposed WACG-FM facility as a Class A station without taking the proposed antenna height above average terrain and the reference distance to contour; however, the proposed antenna height radiation center Above Average Terrain (AAT) is 429.4 meters. Therefore, in accordance with §73.211(b) of the FCC rules, the proposed WACG-FM station will be a Class C2 facility since the distance to the reference contour in all azimuthal directions would be greater than 39 km and would not exceed 52 km.

### **Attached Figures**

The following list is an index of enclosed figures produced by calculations and engineering studies of the proposed WACG-FM Channel 214 C2 facility.

- 1) Proposed Engineering Specifications (Exhibit 1).
- 2) Antenna Data (Exhibit 2).
- 3) Support Structure Profile/Elevation View of Antenna System (Exhibit 3).
- 4) Antenna Vertical Pattern: 0° - 11° (Exhibit 4)
- 5) Antenna Vertical Pattern: 0° - 90° (Exhibit 5)
- 6) Antenna Vertical Pattern Tabulation (Exhibit 6)
- 7) USGS 7.5-minute topographic quadrangle map depicting the proposed transmitter location and coordinate lines (Exhibit 7).
- 8) Licensed WACG-FM 1 mV/m Contour (Black) vs. Proposed WACG-FM 1 mV/m Contour (Red) – Exhibit 8.
- 9) Proposed 1mV/m (60 dBuV/m) Predicted Contour and Radials, Proposed Transmitter Location, & Principal Community Boundary Depiction (Exhibit 9).

- 10) FM-to-FM Interference Studies - calculated using 3 Arc Second Terrain (Exhibit 10).
- 11) FM Allocation Study - WVNG-FM (Exhibit 11)
- 12) Proposed WACG-FM F(50,50) 60 dBuV/m 3 Arc Second Terrain (Exhibit 12)
- 13) Proposed WACG-FM F(50,10) 100 dBuV/m 3 Arc Second Terrain (Exhibit 13)
- 14) WVNG-FM F(50,50) 60 dBuV/m 3 Arc Second Terrain (Exhibit 14)
- 15) WVNG-FM F(50,10) 100 dBuV/m 3 Arc Second Terrain (Exhibit 15)
- 16) FM Allocation Study - WPWB-FM (Exhibit 16)
- 17) Proposed WACG-FM F(50,10) 54 dBuV/m 3 Arc Second Terrain (Exhibit 17)
- 18) WPWB-FM F(50,50) 60 dBuV/m 3 Arc Second Terrain (Exhibit 18)
- 19) WPWB-FM F(50,10) 54 dBuV/m 3 Arc Second Terrain (Exhibit 19)
- 20) FM Allocation Study – WMVV-FM (Exhibit 20)
- 21) Proposed WACG-FM F(50,10) 40 dBuV/m 3 Arc Second Terrain (Exhibit 21)
- 22) WMVV-FM F(50,50) 60 dBuV/m 3 Arc Second Terrain (Exhibit 22)
- 23) WMVV-FM F(50,10) 40 dBuV/m 3 Arc Second Terrain (Exhibit 23)
- 24) FM Allocation Study - All (Exhibit 24)
- 25) WJBF-TV6 Consent Letter (Exhibit 25)
- 26) Area Gained vs. Area Lost Contour Map (Exhibit 26)
- 27) Area in GA served by licensed WACG-FM facility (Exhibit 27)

### **Transmitter Location**

The licensed WACG-FM facility is currently operating on a 1,292-foot, Media General support structure located in SC with its antenna side-mounted at a 272-foot AGL radiation center height. The proposed FM antenna would be side-mounted on the WCES-TV support structure and would have a 1,350-foot AGL radiation center height (Exhibit 3). The proposed tower is registered with the FCC and has a registration number of 1018796. The proposed antenna structure's address is 2316 Miller PL RD Wrens, GA.

*Kessler and Gehman Associates, Inc.*

Telecommunications Consulting Engineers

### **Proposed vs. Licensed**

The F(50,50) 60.0 dBuV/m protected service contours for the licensed (black) and proposed (red) WACG-FM facilities are depicted in Exhibit 8. It can be seen that the proposed facility would serve a much larger area of GA than the licensed facility.

### **Principal Community**

The F(50,50) 60.0 dBuV/m protected service contour for the proposed WACG-FM facility is depicted in Exhibit 9. It can be seen that the proposed facility's F(50,50) 60.0 dBuV/m service contour would completely encompass Augusta, GA in all azimuthal directions. Augusta, GA is the community of license for the WACG-FM station.

### **Interference Study – Calculated Using 3 Arc Second Terrain**

Exhibit 10 is an FM-to-FM interference study, which was calculated using 3 arc second terrain, and verifies that the proposed WACG-FM (5.6 kW ERP) facility's F(50,10) interfering contours would not overlap any applicable station's F(50,50) 60.0 dBuV/m protected contours and that the proposed WACG-FM (5.6 kW ERP) facility's F(50,50) 60.0 dBuV/m protected contour would not be overlapped by any applicable station's F(50,10) interfering contours.

### **Allocation Studies – Calculated Using 3 Arc Second Terrain**

Exhibit 11 is a pictorial depiction of the contour relationship between the proposed WACG-FM facility's F(50,50) 60.0 dBuV/m protected (blue) and F(50,10) 100.0 dBuV/m interfering (red) contours and the 2<sup>nd</sup>-adjacent WVNG-FM facility's F(50,50) 60.0 dBuV/m protected (blue) and F(50,10) 100.0 dBuV/m interfering (red) contours. It can be seen that unacceptable overlap would not exist between the two stations. Exhibits 12-15 depict the 3 arc second terrain data for each station's F(50,50) 60 dBu and F(50,10) 100 dBu contours.

Exhibit 16 is a pictorial depiction of the contour relationship between the proposed WACG-FM facility's F(50,50) 60.0 dBuV/m protected (blue) and F(50,10) 54.0 dBuV/m interfering (red) contours and the 1<sup>st</sup>-adjacent WPWB-FM facility's F(50,50) 60.0 dBuV/m protected (blue) and F(50,10) 54.0 dBuV/m interfering (red) contours. It can be seen that unacceptable overlap would not exist between the two stations. Exhibits 17-19 depict the 3 arc second terrain data for each station's F(50,10) 54 dBu contour and the F(50,50) 60 dBu contour for the WPWB-FM facility. The 3 arc second terrain data for the proposed WACG-FM F(50,50) 60 dBu contour is depicted in Exhibit 12.

Exhibit 20 is a pictorial depiction of the contour relationship between the proposed WACG-FM facility's F(50,50) 60.0 dBuV/m protected (blue) and F(50,10) 40.0 dBuV/m interfering (red) contours and the co-channel WMVV-FM facility's F(50,50) 60.0 dBuV/m protected (blue) and F(50,10) 40.0 dBuV/m interfering (red) contours. It can be seen that unacceptable overlap would not exist between the two stations. Exhibits 21-23 depict the 3 arc second terrain data for each station's F(50,10) 40 dBu contour and the F(50,50) 60 dBu contour for the WMVV-FM facility. The 3 arc second terrain data for the proposed WACG-FM F(50,50) 60 dBu contour is depicted in Exhibit 12.

Exhibit 24 is a pictorial depiction of the contour relationship between the proposed WACG-FM facility's F(50,50) 60.0 dBuV/m protected (blue) and respective F(50,10) interfering (red) contours and the F(50,50) 60.0 dBuV/m protected (blue) and respective F(50,10) interfering (red) contours of the WVNG-FM, WPWB-FM and WMVV-FM facilities plotted on one map.

### **TV Channel 6 Letter of Consent**

The WJBF-TV Channel 6 facility ceased operation on February 17, 2009. Exhibit 25 is a copy of the letter of consent from Media General Communications, Holdings, LLC (Media General), licensee of the WJBF-TV Channel 6 facility. The letter of consent states that the WJBF no longer operates on Channel 6 and that Media General has no objection to the grant of

this application. Therefore, the proposed WACG-FM facility is not required to protect the WJBF-TV Channel 6 station since it no longer operates on TV Channel 6.

### **Area and population Analysis**

The population counts within the licensed and proposed 1 mV/m contours (60.0 dBuV/m) were determined using 2000 U.S. Census data. The area and population gain within the proposed WACG-FM 1 mV/m contour is predicted to be 5,238.87 sq km and 60,170 persons respectively. The area and population loss within the licensed WACG-FM 1 mV/m contour is predicted to be 2,279.54 sq km and 84,441 persons respectively. However, it is predicted that approximately 98.8% of the area/population loss would be in the state of SC. The area and population loss within the licensed WACG-FM 1 mV/m contour in the state of GA is predicted to be only 143.03 sq km and only 958 persons respectively. This represents a predicted area gain within the state of GA of approximately 5,095.84 sq km and a predicted population gain within the state of GA of approximately 59,212 persons (Exhibit 16). The percentage of increase in area within the state of GA ( $5,238.87/2,627.07$ ) is predicted to be 199.4% and the percentage of increase in population within the state of GA ( $24,372/448,335$ ) is predicted to be 19.9%.

### **Intermediate Frequency Interference (53<sup>rd</sup> & 54<sup>th</sup> Adjacent Channels)**

The proposed WACG-FM site would meet all separation requirements pertaining to intermediate frequency (“IF”) interference. The station with the narrowest gap with respect to distance from the proposed WACG-FM transmitter site is ( $214 + 53 = \underline{267}$  &  $214 + 54 = \underline{268}$ ) the licensed WQIL-FM Channel 267 Class C2 facility located approximately 124.6 km from the proposed WACG-FM transmitter site in Chauncey, GA at North Latitude  $32^{\circ} 22' 59''$  and West Longitude  $83^{\circ} 07' 08''$  where a separation of 19.5 km is required; therefore, the distance is easily met with a margin of 105.1 km.

## **FM Blanketing Interference**

Blanketing is defined as interference to the reception of other broadcast stations which is caused by the presence of an FM broadcast signal of 115 dBu (562 mV/m) or greater signal strength in the area adjacent to the antenna of the transmitting station. The 115 dBu contour is referred to as the blanketing contour and the area within this contour is referred to as the blanketing area. The proposed WACG-FM Channel 214 blanketing contour extends 0.93 km from its transmitter and it is understood that GPTC must assume full financial responsibility for remedying new complaints of blanketing interference for a period of one year to all broadcast stations within the proposed WACG-FM blanketing contour.

## **Environmental Impact**

The proposed WACG-FM Channel 214 Class C2 facility will have no significant environmental impact as defined in §1.1307 of the FCC Rules. The FM transmitter, transmission line and antenna system will produce a maximum ERP of 5.6 kW (h-pol only). Assuming the maximum lobe of radiation were oriented toward the base of the tower, the proposed WACG-FM facility's power density six feet above the ground would be  $0.001 \text{ mW/cm}^2$ . This equates to only 0.11% of the Maximum Permissible Exposure (MPE) limits for Occupational/Controlled Exposure and only 0.56% of the MPE limits for General Population/Uncontrolled Exposure authorized by the American National Standards Institute (ANSI). Since operation of the proposed WACG-FM facility will not exceed 5.0% of the MPE limit for Occupational/Controlled Exposure or General Population/Uncontrolled Exposure at any point on the ground, the proposed facility is not considered a “significant contributor” to the RF exposure environment pursuant to OET Bulletin 65, Edition 97-01. Therefore, contributions of exposure from other sources were not accounted for in this analysis. It is safe to conclude that the emissions would be insignificant and well within the maximum allowable requirements.

If other antennas are placed on the tower in the future, the licensee will cooperate with those users by reducing or completely terminating the power to the antenna when maintenance

*Kessler and Gehman Associates, Inc.*

Telecommunications Consulting Engineers

workers are in danger from the electromagnetic radiation emanating from the antenna. It is also understood that additional antennas on the support structure could increase the overall RF exposure levels and it is the responsibility of each licensee to ensure that the total RF exposure resulting from the operation of all antennas on the support structure do not exceed the maximum permissible exposure level at any point on the ground.

### **Certification**

This technical statement was prepared by William T. Godfrey, Jr., Telecommunications Technical Consultant with Kessler and Gehman Associates, Inc. having offices in Gainesville, Florida and has been working in the field of radio and television broadcast consulting since 1998. He graduated from the University of North Florida with a Bachelor of Arts degree in Criminal Justice and a minor in Mathematics in 1993. As a Professional in the field of Telecommunications he states under penalty of perjury that the information contained in this report is true and correct to the best of his knowledge and belief.

This document contains proprietary and confidential information of Dielectric Communications and SPX Corporation. It is to be used solely for the purpose for which it is provided. No disclosure, reproduction, or use of this document or any part of it may be made without the written permission of Dielectric Communications or SPX Corporation.

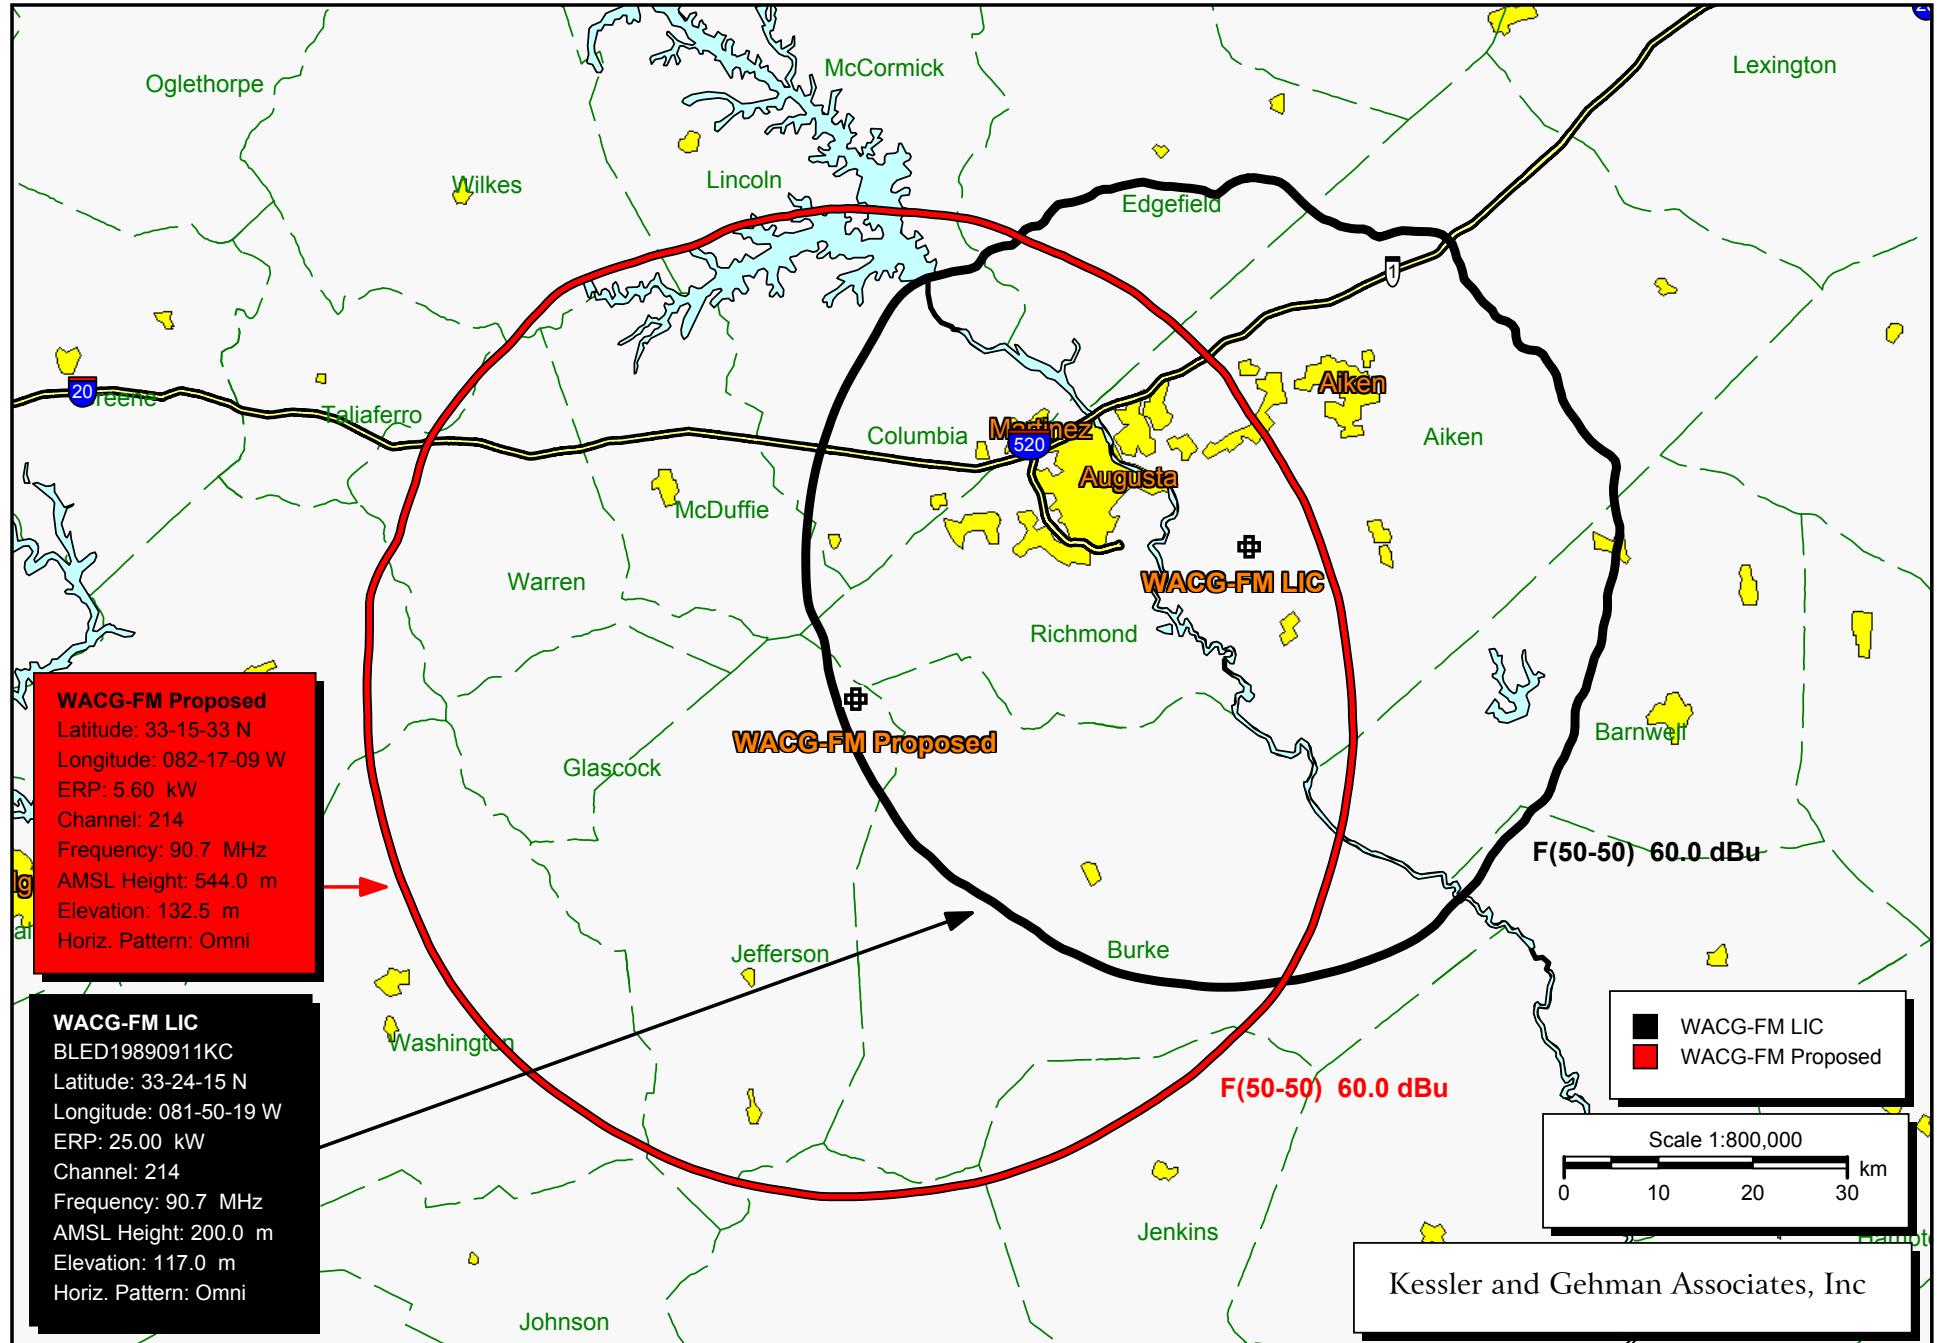

The logo for Kessler and Gehman features a large, stylized letter 'K' on the left and a large, stylized letter 'G' on the right, both in a bold, serif font. Between these two letters is a horizontal banner with the company name "KESSLER AND GEHMAN" in a bold, serif font. Below the banner, the words "TELECOMMUNICATIONS CONSULTING ENGINEERS" are written in a smaller, all-caps, sans-serif font. Underneath that, the address "507 N.W. 60th Street, Suite C" and "Gainesville, Florida 32607" are provided in a smaller, all-caps, sans-serif font.

Average HAAT for radials shown: 428.9 m

## Proposed WACG-FM F(50,10) 100 dBu 3 Second Terrain

Call Letters: WACG-FM APP

Latitude: 33-15-33 N

Longitude: 082-17-09 W

ERP: 5.60 kW

Channel: 214

Frequency: 90.7 MHz

AMSL Height: 544.0 m

Elevation: 132.5 m

HAAT: 429.4 m

Horiz. Antenna Pattern: Omni

Type of contour: FCC

Location Variability: 50.0 %

Time Variability: 10.0 %

# of Radials Calculated: 360

Field Strength: 100.00 dBuV/m

Primary Terrain: 3 Second US Terrain

Average HAAT for radials shown: 81.0 m

# WVNG-FM F(50,10) 100 dBu 3 Second Terrain

Call Letters: WVNG-FM CP  
File Number: BMPED20080814ADW  
Latitude: 33-40-33 N  
Longitude: 082-37-15.30 W  
ERP: 5.00 kW  
Channel: 212  
Frequency: 90.3 MHz  
AMSL Height: 220.0 m  
Elevation: 154.0 m  
HAAT: 82.0 m  
Horiz. Antenna Pattern: Omni

Type of contour: FCC  
Location Variability: 50.0 %  
Time Variability: 10.0 %  
# of Radials Calculated: 360  
Field Strength: 100.00 dBuV/m

Primary Terrain: 3 Second US Terrain

Average HAAT for radials shown: 81.0 m

WPWB-FM LIC vs. WACG-FM APP Single Allocation Study

EXHIBIT 16

## Proposed WACG-FM F(50,10) 54 dBu 3 Second Terrain

Call Letters: WACG-FM APP

Latitude: 33-15-33 N

Longitude: 082-17-09 W

ERP: 5.60 kW

Channel: 214

Frequency: 90.7 MHz

AMSL Height: 544.0 m

Elevation: 132.5 m

HAAT: 429.4 m

Horiz. Antenna Pattern: Omni

Type of contour: FCC

Location Variability: 50.0 %

Time Variability: 10.0 %

# of Radials Calculated: 360

Field Strength: 54.00 dBuV/m

Primary Terrain: 3 Second US Terrain

Bearing (deg)	Distance (km)	HAAT (m)

Average HAAT for radials shown: 134.5 m

WMVV-FM LIC vs. WACG-FM APP Single Allocation Study

EXHIBIT 20

## Proposed WACG-FM F(50,10) 40 dBu 3 Second Terrain

Call Letters: WACG-FM APP

Latitude: 33-15-33 N

Longitude: 082-17-09 W

ERP: 5.60 kW

Channel: 214

Frequency: 90.7 MHz

AMSL Height: 544.0 m

Elevation: 132.5 m

HAAT: 429.4 m

Horiz. Antenna Pattern: Omni

Type of contour: FCC

Location Variability: 50.0 %

Time Variability: 10.0 %

# of Radials Calculated: 360

Field Strength: 40.00 dBuV/m

Primary Terrain: 3 Second US Terrain

Re: Application of Station WACG-FM to Modify its Facilities  
FCC File No. BPED-20090218ABZ

Dear Mr. Frank:

By this letter, Media General Communications, Holdings, LLC, licensee of Station WJBF, Augusta, GA, hereby consents to the FCC's grant of the above-referenced application of the Georgia Public Telecommunications Commission to modify the facilities of Station WACG. Station WJBF is no longer operating on Channel 6 and has no objection to the grant of GPTC's application.

Very truly yours,

George L. Mahoney
