**Subject:** KTLO-LP

Mohammad:

This will confirm, with respect to KTLO-LP's recently filed application for extension of STA for KTLO-LP, Colorado Springs, CO, that KTLO-LP will promptly cease broadcasting on channel 45 should it cause any interference to KWHD-DT (channel 46) or should it cause interference to any other full power station (or any other station that is entitled to protection against unlawful interference).

Indeed, KTLO-LP understands that KWHD-DT has a CP for a permanent, post-transition digital facility on channel 45, but it has delayed (possibly for financial reasons) its final post "transition" move from channel 46 to channel 45. The Chief Engineer for KTLO-LP remains in contact with KWHD-DT and will coordinate the two stations' operations to avoid any interference and to eventually "switch channels."
