RE: KCIB-LP Displacement Application Tower Registration

Thursday, December 09, 2010

Sirs;

Immanuel Baptist Church, licensee of KCIB-LP, is requesting a displacement application for their digital migration. KCIB-LP is currently on air, and in good standing with the commission's rules and regulations.

KCIB-LP's Tower is a pre constructed tower existing before the application for digital. Due to the proximity to the El Dorado Downtown Airport – Stevens Field (FAA Identifier F43), an FAA Aeronautical Study was issued on 11/19/1993 and completed on 03/22/1994 in reference FAA Study Number 93-ASW-1864-OE. On 12-09-2010 KCIB filed for an FCC Registration number which was granted and was issued FCC# 1276982.

This amendment will provide corrected NAD 27 coordinates as well as FCC tower registration information.

Respectfully,

Joseph Holland
Consulting Engineer
