 P.O. Box 220
 West Frankfort, Illinois 62896

November 26, 2008

In evaluating the proposed digital flash cut for K43FO-CA FID 14302, an outgoing interference study was executed on the proposed design in the attached application using the OET-69 Longley Rice methodology. The stations listed in the table below showed possible interference. When these stations were evaluated for outgoing interference, there was zero percent interference present found in each case when rounded to the nearest whole percent. Attached below is a coverage map showing the original CP coverage and the proposed coverage.
