

Compliance with Special Operating Conditions

The Construction Permit contains several Special Operating Conditions, summarized as follows:

1. The permittee must provide the results of a complete proof-of-performance to establish the horizontal plane radiation patterns for both the horizontally and vertically polarized radiation components.
 2. The permittee must submit an affidavit that a qualified engineer oversaw the installation of the directional antenna system.
 3. The permittee must provide an affidavit from a licensed surveyor to establish that the directional antenna has been oriented at the proper azimuth.
 4. The permittee must provide a statement that the relative field strength of neither the measured horizontally nor vertically polarized radiation component exceeds, at any azimuth, the value indicated on the composite radiation pattern authorized by the construction permit.
 5. Waiver of 47 C.F.R. Section 73.1125 has been extended to allow operation of this facility as a satellite operation of KLRD(FM), Yucaipa, CA (FIN 60144). See also Exhibit 6.
 6. The permittee/licensee must reduce power or cease operation as necessary to protect persons having access to the site, tower, or antenna from radiofrequency electromagnetic fields in excess of FCC guidelines.
- .Conditions one through four have been met, and are documented in Exhibit 9A and 9B.
 - Condition five has been met. See Exhibit 6.
 - EMF agrees to fully cooperate with other site users to reduce power or cease operation as necessary to protect persons having access to the site, tower, or antenna from radiofrequency electromagnetic fields in excess of FCC guidelines

Therefore, all Special Operating Conditions of the WZRI Construction Permit (FCC File Number BMPED-20031222ABV) have been met.
