Nighttime Coverage Contours
Licensed, Permitted and Proposed

Lambert conformal conic map projection. Map data taken from Sectional Aeronautical Charts, published by the National Ocean Survey. City limits shown taken from U.S. Census Bureau TIGER/Line 2000 data. Proposed contours projected using the FCC Figure M3 soil conductivities. Licensed contours projected using measured soil conductivity where available; see Exhibit 14F.

Note: Proposed facility provides coverage to 98.7% of the population and 98.1% of the area of the city of license and therefore complies with FCC Rule 73.24(i).

Proposed 1 V/m Blanketing Contours

According to 2000 U.S. Census, 30,810 and 32,210 persons reside within the daytime and nighttime blanketing contours, respectively, with 6,614,487 and 6,866,877 persons residing within the daytime and nighttime 25 mV/m contours. Therefore the proposed operation meets the blanketing contour requirements in FCC Rule 73.24(g).

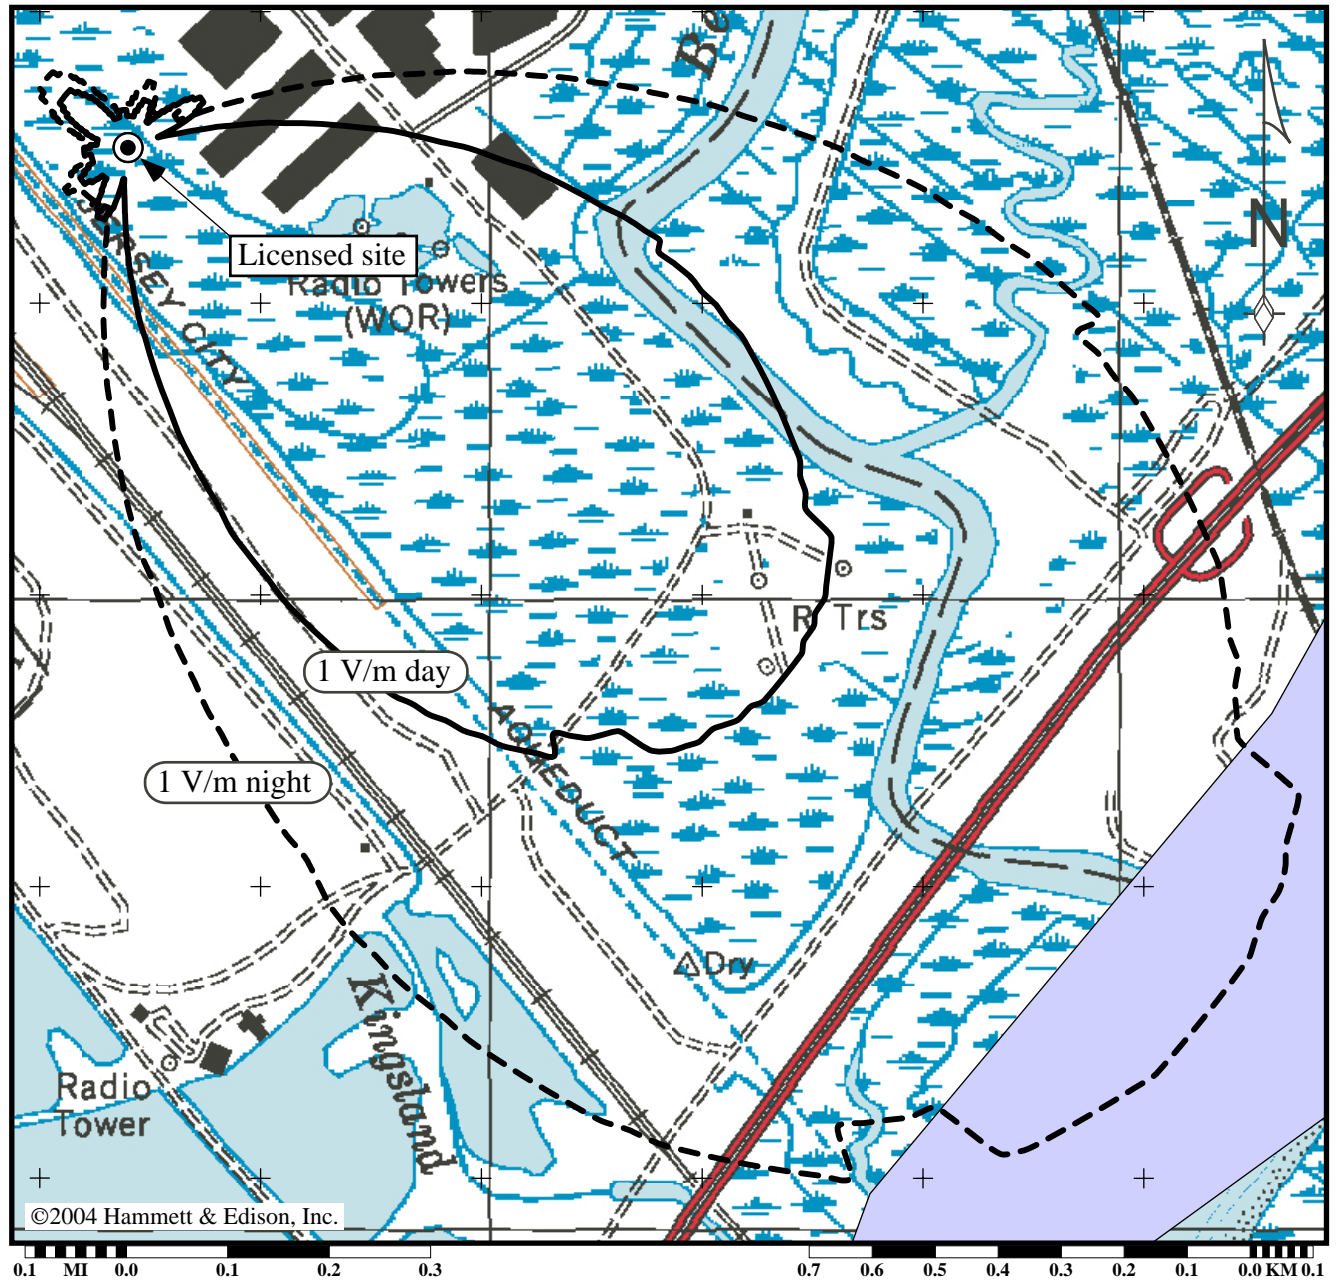

Permitted 1 V/m Blanketing Contour

According to 2000 U.S. Census, 44 persons reside within the daytime blanketing contour and no persons reside within the nighttime blanketing contour.

Licensed 1 V/m Blanketing Contour

Zero persons reside within the blanketing contours.
