This amendment reflects the fact that the recent grant of Great Plains' application for a construction permit for a new full power FM NCE station at Scott City, KS has become a final order, and a license application has been filed. The Great Plains application for a construction permit for a new full power FM NCE construction permit at Fairview, OK has been granted, but has not yet become final. Anticipating finality for the Fairview application, this CP has been removed from the list of pending applications. This amendment also adds KNGM, Emporia, KS to the list of full-power NCE FM stations.
