Re: WIMA(AM), Lima, Ohio
Facility Identification Number: 37498
Jacor Broadcasting Corporation
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed March 22, 2005, on behalf of Jacor Broadcasting Corporation ("Jacor"). Jacor seeks further extension of the special temporary authority ("STA") originally granted on September 7, 2001.¹ In support of the request, Jacor states that incorrect data had been used in its proof of performance and that additional time is required to repeat the measurements.

Our review indicates that Jacor's application for direct measurement of power, File No. BZ-20060607ADU, was dismissed by the staff on February 9, 2007. Thus, extension of STA is warranted to allow time for correction of the problem.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WIMA may continue to operate during nighttime hours with parameters at variance from licensed values and/or reduced power while maintaining monitor points within licensed limits. It will be necessary to further reduce power or cease operation if complaints of interference are received. Jacor must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310.

This authority expires on **April 22, 2008**. Any request for further extension of this authority must be accompanied by a detailed progress report and will be evaluated on the basis of the information provided.

Sincerely,

Charles N. Miller, Engineer
Audio Division
Media Bureau

cc: Jacor Broadcasting Corporation

¹ WIMA is licensed for operation on 1510 kHz with 1 kilowatt daytime and 1 kilowatt nighttime, employing a directional antenna during nighttime hours only (DA-N-U).
