

**Engineering Statement**

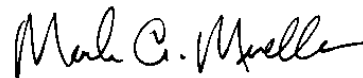

This exhibit was prepared in support of a request to change the authorized daytime and nighttime directional antenna systems at KTKT (AM), Tucson, Arizona (facility ID 2744) and decrease nighttime power to 0.5 KW. The proposed facility will use three of the existing KTKT towers and ground system day and night and no tower construction is necessary. The remaining two towers will be dismantled.

**EMR Exposure Hazard Statement**

The facility will incorporate fenced towers with locked gates, with the fences set to the distances required by the 10 KW maximum input power. The station will change modes, reduce power or cease transmission if workers need to remain inside the fences for extended periods of time.

This engineering exhibit was prepared by me and is true and correct to the best of my knowledge and belief.
