Re: KCMT (FM), Green Valley, AZ  
Arizona Lotus Corp.  
Facility Identification Number: 2746  
Special Temporary Authority (STA)  
BSTA-20151020AAT

Dear Licensee:

This is in reference to the request filed October 20, 2015, on behalf of Arizona Lotus Corp. ("ALC"). ALC explains that KCMT's tower has been severely damaged due to an apparent guy wire failure. The station resumed operations using emergency facilities at an available site pursuant to Section 73.1680 of the Commission's rules. ALC seeks Special Temporary Authority to continue these operations until repairs to the licensed facility can be effected.<sup>1</sup>

The request for STA IS HEREBY GRANTED. Station KCMT may continue operating with the following emergency facilities:

Channel	221 (92.1 MHz)
Coordinates:	32° 14' 55" NL, 111° 06' 57" WL
Effective radiated power:	1.1 kilowatts (V), directional towards 88° True

Antenna height:	
above ground:	13 meters
above mean sea level:	1342 meters
above average terrain:	573 meters

---

<sup>1</sup> Section 73.1680 of the Commission's rules provides for operation with emergency antenna facilities following damage to authorized antenna systems, provided that an informal request for continued use of an emergency antenna is filed with the Commission within 24 hours. In particular, Section 73.1680(b)(2) provides that FM and TV stations may erect any suitable radiator, or use operable sections of the authorized antenna(s) as an emergency antenna.

ALC must notify the Commission when licensed operation is restored. ALC must use whatever means are necessary to protect workers and the public from radiofrequency exposure in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **April 19, 2016**.

-----

**STA Advisory:** Section 309(f) of the Communications Act of 1934, as amended, authorizes the Commission to grant STA in cases of "extraordinary circumstances requiring temporary authorizations in the public interest and when delay in the institution of the temporary operations would seriously prejudice the public interest." However, Section 309(f) is not a means by which a licensee/permittee may circumvent established processing procedures which require the filing of an application, nor is it a means by which a broadcaster may enhance his facility or make operation more convenient for the broadcaster. Stations operating with less than licensed facilities under temporary authorities can be viewed as receiving the benefit of a larger protection area than that in which they are currently providing service.

Accordingly, Special Temporary Authorities by nature are to be temporary and are not intended for extended use. Licensees of stations operating under temporary authorities are reminded that timely restoration of permanent facilities is the responsibility of the licensee and should be undertaken expeditiously. Any request for extension of special temporary authorities carries an increased burden with each subsequent request.

Therefore, requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Sincerely,

Dale Bickel  
Senior Engineer
