

Affidavit of Installation
WWHI, Muncie, IN
FCC Form 302-FM

Mark McDaniel
Senior Broadcast Engineer
Ball State University

As a senior broadcast engineer with over 20 years of electronic systems engineering experience, I oversaw the work in putting together and installing the new WWHI antenna manufactured by Propagation Systems, Inc. (PSI model number: PSIFML-2A-50WS-H-DA) and as authorized by the FCC construction permit (BPED-20130403ABV) granted for use of that antenna.

I also supervised the work of the surveyor, the certificate of whom also is submitted with this application, attesting to the azimuth of the installed antenna.
