**MILLER COMMUNICATIONS, INC.**  
**NEW FM FILL-IN TRANSLATOR STATION**  
**CH 278D - 103.5 MHZ - 0.25 KW**  
**SUMTER, SOUTH CAROLINA**  
**March 2003**

**TECHNICAL STATEMENT**

This technical statement was prepared on behalf of Miller Communications, Inc. ("MCI"), an applicant seeking authority to construct a new FM fill-in translator station to rebroadcast the signal of station WWKT, Channel 257C3, Kingstree, South Carolina. The proposed translator signal is completely encompassed within the protected service contour of WWKT. As such, this is considered a fill-in translator (see Exhibit A).

The proposed new FM translator antenna system will be mounted on an existing tower which has been registered with the FCC and assigned Antenna Structure Registration number 1044608. As such, the FAA has not been notified of this proposed construction

Attached as Exhibit B is a study demonstrating that the proposed translator will not cause interference to any full service station, nor will interference be delivered to or received from any existing FM translator station, or LPFM application. Using the radio frequency radiation worksheets associated with FCC Form 349, it has been determined that this proposal is in compliance with the Commission's radio frequency radiation guidelines.
