MBR Licensee, LLC
KAEH(FM) Beaumont, California
Facility ID 3727
Ch. 265A 5.3 kW 38 m

MBR Licensee, LLC, (“*MBR*”) is the licensee of FM radio station KAEH(FM), Ch. 265A, Beaumont, California (file number BLH-20000330ACC). KAEH(FM) is licensed to operate with an effective radiated power (“ERP”) of 1.5 kW at an antenna height above average terrain (“HAAT”) of 146 meters. The instant application seeks authority to relocate the transmitter to a new communications site.

Nature of the Proposal

As specified herein, the KAEH(FM) facility will operate with an ERP of 5.3 kW and an antenna HAAT of 38 meters¹. The proposed non-directional FM antenna will be installed on a new support structure at the coordinates shown below. The FAA has issued a “Determination of No Hazard”² for the proposed structure. The structure was registered (ASR number 1263499) after an Environmental Assessment was completed, confirming no impact.

33° 56’ 51.0” N. Latitude (NAD 27)
116° 59’ 02.6” W. Longitude (NAD 27)

Community Coverage

As demonstrated in the attached **Exhibit 26 - Figure 1**, the 70 dBμ F(50,50) contour encompasses 98.2 percent of the Beaumont city area and 100 percent of the population within the Beaumont community boundary. This is believed to comply with Commission policy regarding community coverage.

¹ The ERP of 5.3 kW at the proposed 38 meters HAAT is established by the 98 km distance limit set in §73.213(c)(1) for the 34 dBμ F(50,10) contour.

² FAA Study Number 2007-AWP-4547-OE

NATURE OF THE PROPOSAL
ALLOCATION CONSIDERATIONS
(Page 2 of 3)

Allocation Considerations

As shown in **Exhibit 26 – Table I**, the proposed KAEH(FM) facility meets the minimum distance separation requirements of Section 73.207 of the Commission’s Rules with respect to all other stations, vacant allotments, and proposals, as contained in the Commission’s CDBS database with the exception of KRTH(FM) (Ch. 266B, Los Angeles, CA). The KAEH(FM) Channel 265A Beaumont, California allotment is grandfathered under §73.213(c)(1) of the Rules with respect to KRTH(FM)³. The minimum distance spacing to first adjacent KRTH(FM) is 105 km as specified by §73.213(c)(1). The distance between the proposal and KRTH(FM) is 105 km when rounded to the nearest kilometer. Thus, the proposed facility is fully spaced in accordance to §73.208 of the Rules.

International Coordination

The proposed facility is located 154.7 km from the nearest U.S. – Mexican border. This is within the required 320 km coordination distance for facilities near international borders. Channel 265 at Beaumont, CA is coordinated as a Class B facility with Mexico.⁴ The nearest pertinent Mexican facility is XHAT-FM (Ch 266B, Ensenada, BN, Mexico) at a distance of 235.2 km, much greater than the required 164 km Class B-to-Class B spacing.⁵ Considering that the proposal is not upgrading its Class, and is proposing a location farther from the Mexican border, it is believed that international coordination will not be required. If coordination with Mexico is deemed necessary, *MBR* respectfully requests coordination for the proposal.

Other Considerations

The nearest FCC monitoring station is 601.1 km distant at Livermore, California. This exceeds the threshold minimum distance specified in §73.1030(c)(3) that would suggest consideration of the monitoring station. The proposed site is also located outside the bounds of the area specified in §73.1030(a)(1). Thus, notification of the instant proposal to the National Radio Astronomy Observatory

³ See MM Docket No. 90-21, RM-7126, Report and Order, adopted April 1, 1991, released April 16, 1991, footnote 2.

⁴ See FM Radio Broadcast Agreement with Mexico, signed August 11, 1992, effective June 2, 1995; Annex 2, Table B, Part I, United States of America Table of Allotments, page 2.

⁵ Ibid; paragraph 1.2.1, Table 2.

ALLOCATION CONSIDERATIONS
(Page 3 of 3)

at Green Bank, West Virginia is not required. There are no AM broadcast facilities within 3.2 km (2 miles) of the proposal according to information extracted from the Commission's CDBS database.

It is thus believed that the facility proposed herein will satisfy all of the pertinent Commission Rules and Policies now in effect regarding allocation matters.
