

**EXHIBIT 1 Within 3.2 km of AM array**

KXNT-FM FAC ID 12560

FCC 301 Application

July 9, 2013

CBS Radio Stations Inc.

The proposed transmitting antenna will be installed on a new tower co-located within the antenna array of CBS owned station KXST(AM). The tower will be detuned at the operating frequency of KXST. Prior to commencement of construction, an application for STA will be filed with the Commission seeking approval to operate KXST with parameters at variance to maintain monitor points within licensed values until construction is completed and the tower detuning network has been properly adjusted.
