Priscilla,

We will be very happy to accept the 23.5 kw operation. Do you need an amendment application from us, or can you grant at the lower power?

Thank you for your email about this, and your prompt attention!

Hello,

The minor mod proposes to increase the HAAT by 42 meters which would trigger a questionable station class. You may either reduce the ERP from 24 kW to 23.5 kW, or reduce the HAAT from 1183 m to 1180 m to conform the facility to its proper class.

Please let me know by email and I can fix this accordingly.

Regards,

Priscilla M. Lee
