COMPREHENSIVE TECHNICAL EXHIBIT

APPLICATION FOR CONSTRUCTION PERMIT
KHFD-LD, FCC ID 127785
FCC FILE NUMBER BLDTL-20090724ADZ
EICB-TV EAST, LLC

Application for Minor Change to Licensed Facility. This application seeks to modify the licensed facility with respect to tower location, ERP and antenna pattern. The service contour of the within proposal enjoys overlap with that of the underlying licensed facility; the same community is served.

Interference Study; Use of full service Mask filter. An OET 69 Longley-Rice study exhibit was performed for the above-captioned application. It was run on a Sun Blade computer running the official FCC Longley-Rice program as provided by Techware, Inc. ***The study yielded the information that the within application requires the use of a full service mask filter to comply with with all appropriate sections of §74.793.***

It should be noted that the study dealt with FCC File number BLTTA-20050218ACB (KATA-CA, Facility ID 26950, Mesquite, TX) and showed in excess of the allowable 0.5% interference to this facility. Inasmuch as this is the analog license of this facility which has since been superseded by its digital license, BLDTA-20090604ABX, the analog file number is obsolete.
