Dave Doherty
Skywaves Consulting LLC
PO Box 4
Millbury, MA 01527-0004

Ref: KVLA and KRCK, K238AK, K251BX

Dear Mr. Doherty,

We anticipate no adverse effects to the directional pattern of KVLA antenna from KRCK, K238AK or the K251BX antenna. Based on our records of the site, there is in excess of 80 feet of lateral separation between the utility pole that supports the KVLA antenna and the tower proposed for the KRCK, K238AK and K251BX antennas.

If you have any additional questions please don't hesitate to call.

Sincerely,

Douglas A. Ross
President
