**TECHNICAL STATEMENT**

This Technical Statement and attached exhibits were prepared on behalf of State Broadcasting Corporation ("State"), licensee of FM radio station WQZY, Channel 240C1, Dublin, Georgia. State has an outstanding construction permit to make changes in the WQZY facilities. State herein proposes to modify the permit by declaring new Class C0 reference coordinates for WQZY. No other changes are proposed.

This application is filed concurrent and contingent with an application to upgrade WWBD to Class C3. To accommodate the WWBD upgrade from Class A to Class C3 on Channel 239C3, a clear reference site has been designated, which meets the requirements of §73.207, and from which a 3.16 mV/m contour will be placed over the community of Dublin.

The WQZY construction permit site are North Latitude 32° 38' 15", West Longitude 82° 36' 32". While this site is shortspaced to the WWBD **application** and WWBD requests processing pursuant to §73.215 toward WQZY, State specifically does **NOT** request §73.215 processing, as the proposed WWBD application fully protects WQZY as a maximum Class C0 facility at the construction permit site. See Exhibit A for details. All other necessary documentation used to certify the technical portion of FCC Form 301 have been forwarded to the applicant and is available for submission to the Commission upon request.
