For All concerned and
Kate Michler, V-Soft Communications

I have supervised the installation of equipment for K227BB construction permit and can verify that

1. The antenna type Scala/Kathrein FMV-1 was placed at 17 meters, vertical position, at azimuth 230 degrees from North for the primary directivity.
2. The transmitter installed is Larcan FM100 integrated translator, tested at 100 watts TPO.
3. There is installed a Telewave TWPC 1005-1 channel pass cavity on the transmit line with measured insertion loss of 0.85 dB, and 70 foot of Belden transmission coax type 8237.
