

I, Rob Dempsey, Director of Network Programming for Radio Training Network station WLFJ-FM do hereby certify the following:

That I have personally visited and made the following observations at the tower site (FCC ASR Registration number 1015404) located at 2400 Ownby Ln. Richmond, Va. On Sunday, August 24, 2003:

- 1) A 2 -story Warehouse structure approximately 600 feet north of the tower base
- 2) A 2 -story brick structure approximately 1,000 feet North East of the tower base.
- 3) A single story brick/aluminum structure approximately 300 feet East of the tower base. (Warehouse)
- 4) A single story brick/aluminum structure approximately 300 feet South East of the tower base. (Warehouse)
- 5) A single story brick/aluminum structure approximately 25 feet West of the tower base. (Storage structure)
- 6) An open field due South of the Tower Base.
- 7) The location of the tower site is in an industrial park.

These are the only significant structures that I observed around this tower site. An 8-foot chain link fence, which keeps unauthorized personnel from entering the site, encloses the tower base itself.

  
Rob D. Dempsey Jr.
