Mr. Earl Thompson, President
Okaloosa Public Radio
954 Hwy. C4-A
Baker, FL 32531

Dear Mr. Thompson:

We understand that Okaloosa Public Radio is planning to file an application with the Federal Communications Commission for a minor change to the construction permit of radio station Permit # BPED-19970326MB. Okaloosa Public Radio proposes a change from 20 kw to 35 kw, with no change in antenna HAAT. The station would operate with a vertically polarized antenna.

Okaloosa Public Radio has agreed to correct any interference to the viewers of Georgia Public Broadcasting in a timely manner.

With respect to interference protection for Georgia Public Broadcasting, we concur with the proposed change.

Sincerely,

Mark G. Fehlig
Director of Engineering
