

## **EXHIBIT 19 Channel 6 protection**

Pursuant to 47 CFR 73.525, WRGB, Schenectady, NY, is considered an affected channel 6 TV station because is less than 265 km from the proposed station on channel 201 in Cape Vincent, NY.

Using the applicable procedures from 47 CFR 73.525, it can be shown than no objectionable interference will occur to WRGB's protected contour.

The two stations are separated by 243 km. WRBG's 47dBu contour (along bearing 356°) extends 114 km from its transmitter. Using the 2 db U/D ratio for FM channel 201, the proposal's 49 dBu interference contour, along bearing 176° (where Height Above Average Terrain equals 98 meters w/ERP of 4.0 kW), extends 52 km from the proposed transmitter location.

There is 77 km of clearance between the two contours.
