

The station will comply with Overlap Requirements set forth in 47 C.F.R. Section 74.1204. The only existing broadcast station with overlap is K297BV on channel 297 (a third adjacent) starting at the 37 dBu contour. The three same channel overlaps displayed are the original proposed location for BNPFT-20030314ANL, which we are moving to the coordinates listed in Section 4, the proposed BNPFT-20030314AKL, which is also held by Micro Communications and which we have requested to be dismissed, and BNPFT-20030311AUW, which was dismissed after failing to meet the requirements of the auction.
