

**KBAE(FM) Auxiliary Antenna
Rooftop Access Agreement
August 2017**

The auxiliary (backup) antenna for FM station KBAE is located on the upper rooftop of the Theatre Arts building on the campus of Humboldt State University.

Access to the upper rooftop is strictly controlled and locked, in order to prevent unauthorized persons from accessing the rooftop.

An RF warning sign shall be maintained at the locked access point and on the upper rooftop.

At times when the KBAE auxiliary antenna is operating, access to the upper rooftop of the building is restricted. Should station personnel, university personnel, or building maintenance contractors require access to the upper rooftop while the KBAE auxiliary antenna is operating, operation of the KBAE auxiliary antenna must first cease.

The KBAE licensee has provided Humboldt State University with the name and phone number of its designated engineering contact, who can ensure that the KBAE auxiliary antenna is powered down.

Photos documenting RF warning signs at the KBAE auxiliary antenna installation, including photo of locked rooftop access point.
