Dear Applicant:

The staff has under consideration the above-captioned application for a new LPFM station.

Pursuant to 47 C.F.R. § 17.4(a), any proposed construction of a new antenna structure or proposed alteration of an existing antenna structure that requires notification to the Federal Aviation Administration (FAA) requires registration with the Commission prior to the proposed construction or alteration. Our records indicate that the tower for the facility proposed in the captioned application is not registered. FCC antenna structure registration may be accomplished electronically via the internet at <http://wireless.fcc.gov/antenna/>. Please note that FAA approval is necessary in order to obtain FCC antenna structure registration. Following FCC registration of the antenna structure, a curative amendment to the application, which includes the antenna structure registration number, must be submitted to the Commission so that processing of your application may be completed. Please also note that we emailed the certifying engineer Danny Langston on August 29, 2014, about this defect, and on the same day, Mr. Langston replied and stated that the proposed tower has been filed with the FAA. Since then, the Commission has not received any response, and the tower remains unregistered.

Further action on the subject application will be withheld for a period of twenty (20) days from the date of this letter to provide an opportunity to submit the requested information. If the antenna structure cannot be registered within 20 days of the date of this letter, the Audio Division (AD) must be notified in writing, concerning the delay. In the event that further delays in the registration process occur, the applicant must provide the Audio Division with written updates every 30 days thereafter. Failure to respond within this time period or to provide the written updates every 30 days will result in the dismissal of the application for failure to prosecute pursuant to 47 C.F.R. § 73.3568(a)(1).

Sincerely,

James D. Bradshaw
