Re: Real Life Broadcasting (RLF)  
WIFI(AM), Florence, New Jersey  
Facility Identification Number: 55310  
Special Temporary Authority (STA)  
BESTA-20190801AAV

Dear Mr. Hodgins:

This is in reference to the request filed on August 1, 2019. RLF requests an extension of the STA granted on May 1, 2019, to continue operating with parameters at variance pending further action on BZ-20190522AAS (filed due to the installation of an FM translator antenna).<sup>1</sup> In support of the request, we noted that the application remains on hold at this time to allow time to amend.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

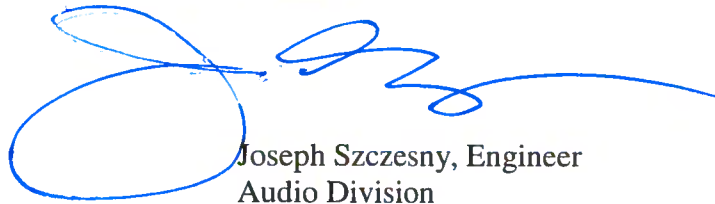

Accordingly, the request for extension of the STA is **HEREBY GRANTED**, and RLF may continue to operate with parameters at variance and/or reduced power if needed while maintaining monitor points within licensed limits. RLF must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

---

<sup>1</sup> WIFI(AM) is licensed for DA operation on 1460 kHz with 5 kW day and 0.5 kW night, employing different patterns.

This authority expires on **February 1, 2020.**

Sincerely,

A handwritten signature in blue ink, consisting of a large loop followed by a series of smaller loops and a long horizontal stroke.

Joseph Szczesny, Engineer  
Audio Division
