

Three Angels Broadcasting Network
Jon Bivin—Engineer
P.O. Box 220
West Frankfort, Illinois 62896

January 25, 2007

In evaluating the proposed Digital Flashcut for K47JK, an outgoing interference study was executed on the proposed parameters on channel 47(T) with an ERP of 15.0 KW. The stations listed in the table below showed possible interference. When these stations were evaluated for outgoing interference using the OET-69 Longley Rice methodology with a cell size of 1km and a 0.1km radial spacing, there was zero percent interference present found in each case. The original site for K47JK has become unavailable, and as such, we have located a new site which will serve the city of license. The original and proposed contours overlap in the center, and since there is no interference, we request that the 10 km limit be waived in this case.
