

Exhibit 13

Radio Training Network Inc.

P O Box 7217

Lakeland, FL 33807-7217

WAIVER REQUEST, SECTION 74.1204

The proposed FM translator will be co-located on the same tower as the amended Application 20030317CCV (Channel 254) in Orangeburg, SC on 3rd adjacent channel 251. This proposed facility will have an ERP of 0.019 kwatts at a height of 101 m AGL. Application 20030317CCV by Miller Communications, Inc will have an ERP of 0.250 kwatts at 105 m AGL and be 11.5 dB stronger than the signal of this application on Channel 251. Because the transmit antennas will be on the same tower and almost the same elevation, the 11.5 dB difference will be consistent in all directions and therefore there is no way for either proposed translator to have a Desired to Undesired signal ratio of 40 dB, the threshold for predicted interference to either facility on 3rd adjacent channels.

Therefore, Radio Training Network Inc. Respectfully requests a waiver of C.F.R 74.1204 based on no population within the area of predicted interference.

Should any actual interference occur, then Radio Training Network, Inc will promptly suspend operation of this translator in accordance with 47 C.F.R. 74.1203.
