June 27, 2006

Mr. Johnston:

I received your letter describing the installation of the new FM translator W300BM on the WHA (AM) tower. I concur, and we waive the need for a partial proof of the nearby WLMV directional antenna system – our plan to confirm DA parameters and monitor point readings before and after the installation of the W300BM will suffice. Please let me know when you have completed the installation of the new antenna system and we will check the WLMV monitor points and operating parameters.

Sincerely,

John A. Bauer
Director of Engineering
