

EXHIBIT 28 Section III Engineering KRBV (FM) Ch 262
--

Infinity Broadcasting Corporation of Fort Worth. (here-in Infinity), the licensee of KRBV, proposes to move the transmitting antenna location of KRBV. The Licensee proposes to use an omni directional antenna, 100 kW average radiated power at 430 meters antenna radiation center height above ground, Coordinates NAD 27 -32-32-35.5N , 096-57-32.0 W.

The proposed transmitter site is short-spaced to KXAL-FM, BLH-1999081KC. KXAL-FM, Ch 262A, is co-channel to KRBV. The proposed KRBV Site will be 225.2 kilometers from the site authorized for KXAL-FM. This is 0.8 Kilometers beyond the spacing minimum of 226 Kilometers.

Because the proposed site is short spaced to KXAL-FM under C.F.R. 47 §73.207, the applicant requests that this application be processed under C.F.R. 47 §73.215 as the proposed site does meet the spacing criteria in 73.215.

However, the KRBV contour does not overlap the KXAL-FM contour.

Spacing studies sketches 1, 2 and 3 show the 73.207, 73.215 and contour overlap of any potentially affected existing Stations, Allocations or Construction Permits

KRBV Spacing Study #1
