**Re: KWMS-LP Displacement Application**  
Facility ID: **131349**

KWMS-LP is an existing licensed facility that is currently authorized to transmit on channel 17. KWMS-LP has applied for a Construction Permit for building a digital facility as a displaced station due to a full power station already transmitting on channel 17 only 170km away in distance.

KWMS is requesting to be placed on channel 18.

KWMS-LP is currently transmitting it's fully allocated power requirement and is in compliance with FCC regulations.
