July 27, 2005

I have examined the WKVH-FM, Monticello, FL directional antenna installation (ERI Model LPX-2E-DA) located at the tower site in Metcalf, Georgia for Education Media Foundation, and have determined that the directional azimuth of the antenna is 273 degrees with respect to True North. The margin of error of the study is better than plus or minus 0.49 degrees.

Sincerely,

Lawrence D. Rowell

Georgia Registered Land Surveyor

Georgia Registration Certificate 2279
