**TECHNICAL STATEMENT**

This Technical Statement was prepared on behalf of Family Worship Center Church, Inc. (“FWCC”), licensee of radio station KNFA, Channel 214A, Grand Island, Nebraska. FWCC holds an outstanding permit to make minor changes to the facilities of KNFA (BPED-20070906ADL). FWCC herein submits a license application to cover the outstanding permit. A calculation of the transmitter power output of the KNFA transmitter is attached as Exhibit A.

There are two operating conditions/restrictions on the KNFA permit. The first condition states that the permit is subject to the condition that the field strength of KNFA will not exceed 27 mV/m at the FCC’s Monitoring Station at Grand Island, Nebraska. Further, it states that should the level of signal at the Monitoring Station exceed this level, or if interference occurs, the power will be reduced or other corrective action will be taken to address the matter. FWCC states that it will keep the level at or below 27 mV/m and will take any needed steps to remedy interference should it occur.

The second condition states that FWCC will reduce the power of KNFA, or cease operation in coordination with other users of the tower, to protect persons having access to the

site from radio frequency electromagnetic fields in excess of FCC guidelines. FWCC will comply with this condition. Based on the foregoing, it is believed that KNFA is in compliance with the Commission's rules and that all conditions have been met.
