MULTIPLE OWNERSHIP SERVICE CONTOUR ANALYSIS

**Prepared for
S+H Broadcasting, LLC
June 2010**

The attached analysis of compliance with the radio multiple ownership rules was prepared in accordance with the Rules and Regulations of the Federal Communications Commission, in connection with an assignment application for station KRSX-FM.

Unrated Market

The following attributable facilities are located in the vicinity of KRSX-FM:

| | | |
|--------|------|---|
| New FM | 238A | Twentynine Palms Base (pending application) |
| New FM | 284A | Amboy (pending application) |

The KRSX-FM license facility at Yermo does not have principal community contour overlap with either of these facilities. However, KRSX-FM also has a pending application for operation at Twentynine Palms, which has principal community contour overlap with the Channel 238A application at Twentynine Palms Base.

These stations would operate inside the Victor Valley Arbitron market. However, since neither is currently licensed in the form in which they would have principal community contour overlap, out of an abundance of caution an analysis has been made consistent with the Commission's interim rules for unrated markets. The 70 dBu contours of FM stations were determined from the technical data contained in the most recent edition of the FCC FM Database. The listed antenna height above average terrain was used together with topographic data obtained from the digitized 30 second or 3 second database. The 5 mV/m daytime contours of AM stations were determined from the technical data contained in the most recent edition of the FCC AM Database. The listed antenna parameter information was used together with a digitized version of the FCC M-3 or

Region II ground conductivity database.

The service contours were plotted using correct map projection mathematics. Those stations whose transmitter sites are within the respective principal community service contours of the stations proposed to be commonly owned have only the sites rather than their contours shown. All contours and enclosed transmitter site locations have been labeled. A list of all stations considered is included with this statement.

In counting stations providing service to the "market" defined by each of the discrete clusters formed in unrated markets, stations whose transmitter sites are located in excess of 92 km from the perimeter of the common overlap area have been excluded, as have other stations to be commonly-owned but which are not a part of the discrete cluster being studied.

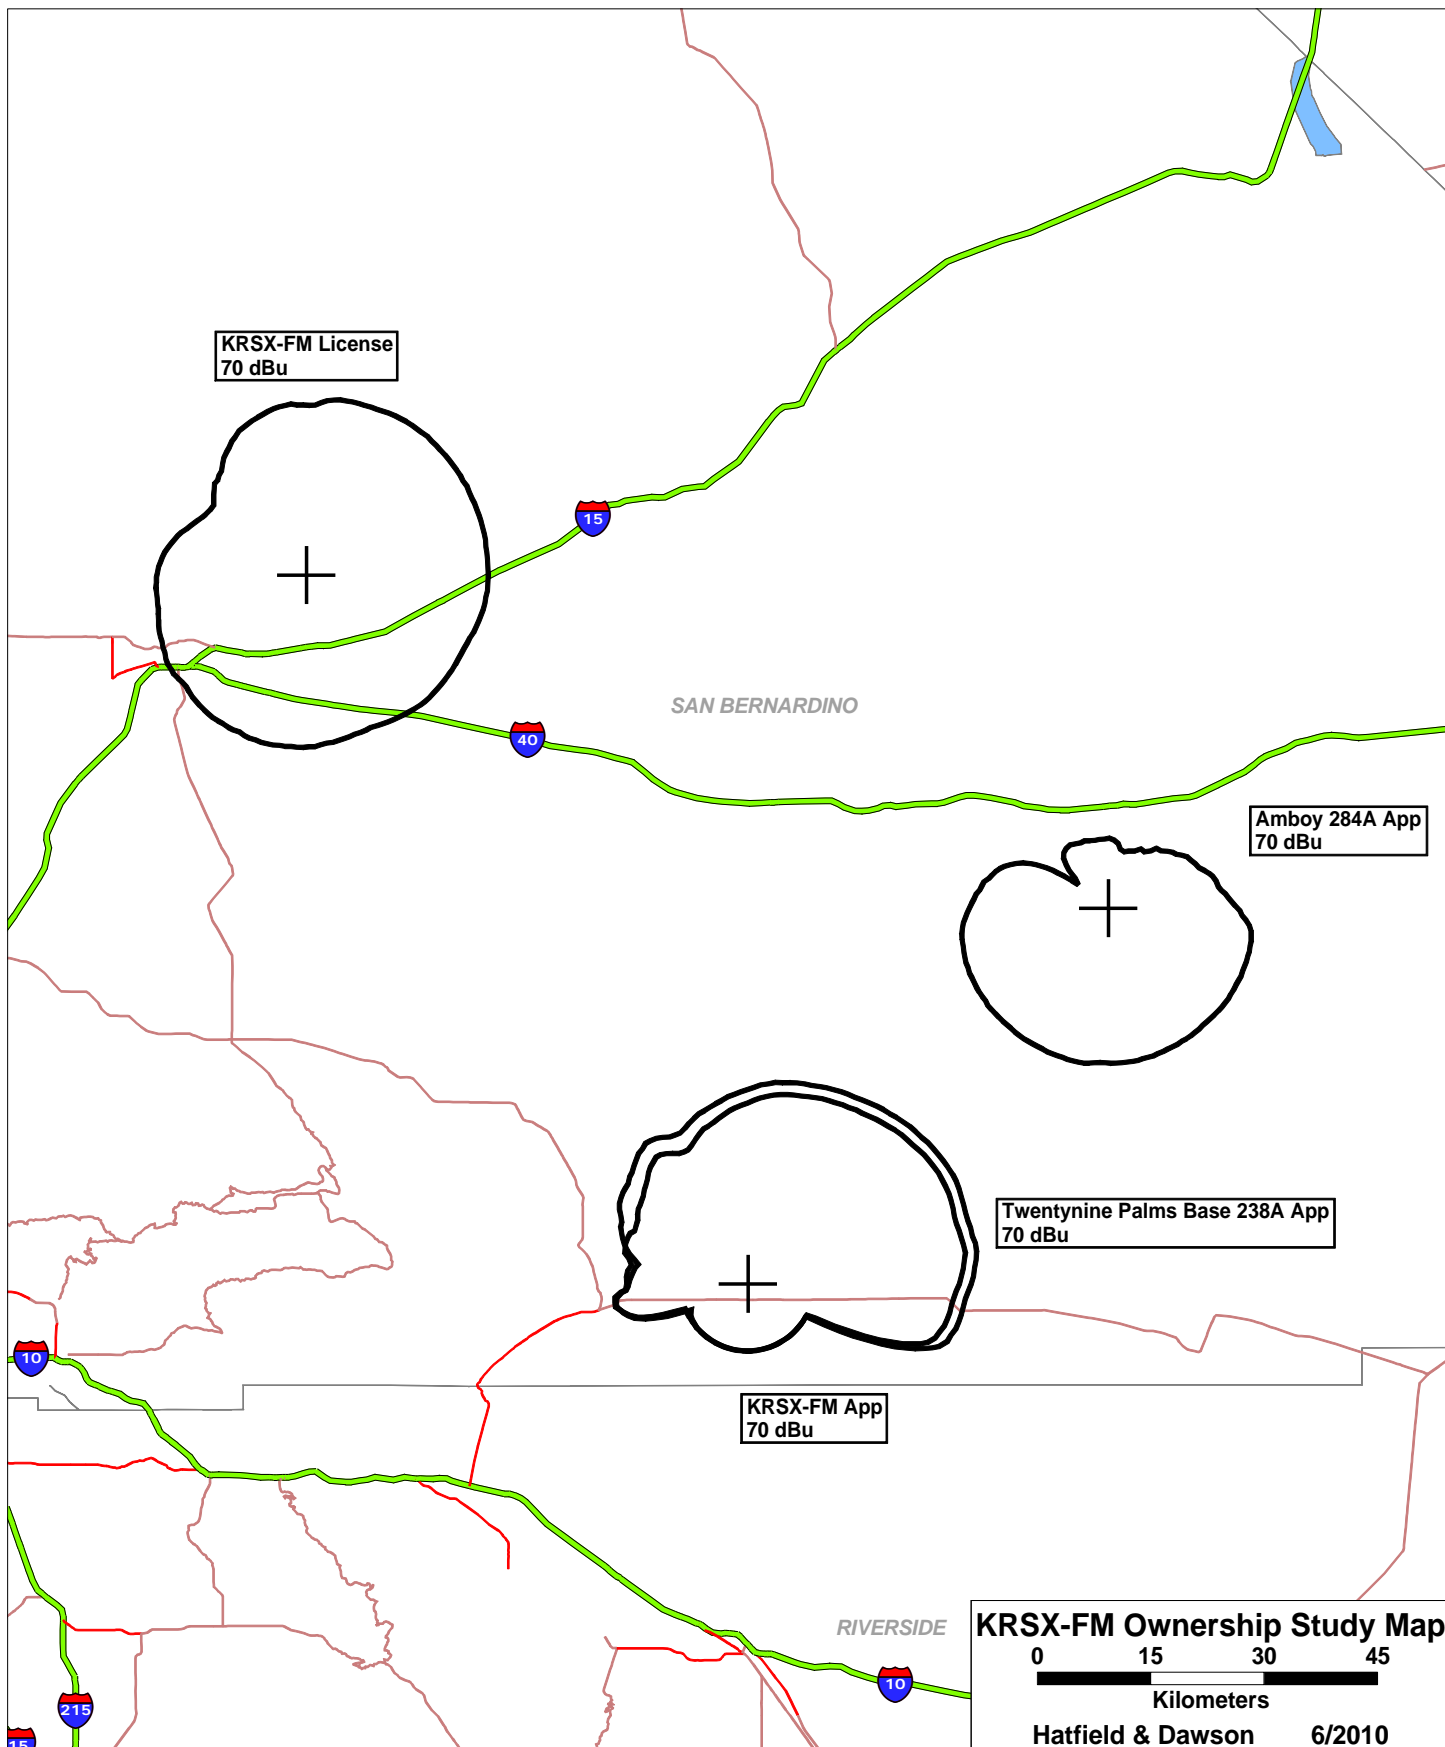

This exhibit evidences at least the minimum number of stations necessary to demonstrate compliance with the rules concerning radio multiple ownership in unrated markets. In order to qualify for common ownership of this OAM/2FM cluster, there must be at least 4 stations in the relevant "market". This study demonstrates that there are at least 6 stations in the relevant market.

June 29, 2010

A handwritten signature in black ink, appearing to read "Erik C. Swanson". The signature is fluid and cursive, with the first name "Erik" and last name "Swanson" clearly distinguishable.

Stations Comprising the Market

KRSX-FM 287A Twentynine Palms (App)
New 238A Twentynine Palms Base (App)
KXCM 242A Twentynine Palms
KCDZ 299B1 Twentynine Palms
KDGL 295B Yucca Valley
KNWH 1250 kHz Yucca Valley

(KXCM 221A has been reallocated out of market, and has therefore been excluded from this analysis.)
