Re: KOGA (AM), Ogallala, Nebraska
Facility Identification Number: 50065
Capstar TX Limited Partnership
Special Temporary Authority

Dear Mr. Langham:

This is in reference to the request filed December 15, 2009, on behalf of Capstar TX Limited Partnership ("Capstar"). Capstar requests further extension of the special temporary authority ("STA") granted on April 16, 2008, to operate Station KOGA with parameters at variance and/or reduced power while maintaining monitor points within licensed limits.¹ In support of the request, Capstar states that, following replacement of one of the station's towers, it has filed Application BP-20091215AAE, for minor changes in the station's operating parameters.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that Application BP-20091215AAE is pending before the Commission; thus, the licensee has made substantial progress toward restoring licensed operation and extension of STA is warranted to allow time for processing of the application.

¹ KOGA is licensed for operation on 930 kHz with 5 kilowatts daytime and 0.5 kilowatt nighttime, employing different directional antenna patterns daytime and nighttime (DA-2-U).

Accordingly, the request for STA IS HEREBY GRANTED. Station KOGA may continue to operate with parameters at variance from licensed values and/or reduced power while maintaining monitor points within licensed limits. It will be necessary to further reduce power or cease operation if complaints of interference are received. Capstar must notify the Commission when licensed operation is restored.² Capstar must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **June 18, 2010**.

Sincerely,

Charles N. Miller, Engineer
