Attn:
Lois Mills

Thank you for your request for information relating to possible interference to KRLC AM. As the engineer in charge of KRLC AM, I made several measurements of our directional parameters both before and after your construction on October 23, 2006. I found no significant difference to our directional array measurements before or after your installation. I can only conclude this construction has not affected our licensed AM directional pattern in the least. I would recommend that your FCC CP, K203ER be approved.

Thank you for the advanced notice in this regard, and if I can be of any further assistance please let me know.

Steve Franko
Group Engineer
