ENGINEERING STATEMENT
MEREDITH CORPORATION
MODIFICATION OF BLTT19890109IG
TELEVISION TRANSLATOR STATION W14AS
WEST ASHVILLE, NORTH CAROLINA
CH 14, 5.3KW-D, 77 MTR. HAAT

This statement supports an application by Meredith Corporation licensee of W14AS a television translator station licensed to serve West Ashville, North Carolina.

The applicant is proposing to “flash-cut” the operation of W14AS from analog to digital at some point in the future when analog transmissions cease.

No change is being proposed to the make or model of the antenna or to the height of radiation center currently authorized. Selection of digital ERP was chosen to provide, at minimum, replication of the current analog facility. An analysis was performed using the methodology stated in OET-69 using same software (tv_process_dlptv) utilized by the Commission for analyzing interference into current users and pending applicants and, therefore, should yield similar results. The results of that analysis indicate the proposed facility is in compliance with 47 C.F.R. Sections 74.709, 74.793(e), 74.793(f), 74.793(g), 74.793(h), 74.794(b) and 73.1030.
