George:

In regards to construction of the FM translator located at the Tri Cities tower site on Sky Line Rd, T/Vestal, operating on 107.1 Mhz, I have reviewed the pre and post proof data. In discussion with Larry Hodge, your consultant, I agree that the translator antenna installation has not presented a problem with the WENE DA-1 operation. Thank you for providing the pre and post data, which we will keep on file.

I do request that you notify Clear Channel/Binghamton of any future modifications in regards to the installation of said antenna and translator.

Kevin Bixby---Chief Engineer
