Exhibit 17

Environment Impact & RFR Compliance Statement

K270BA will be located at an established communications site that is in compliance with all environmental impact requirements.

The proposed modification to K270BA specifies 0.120 kW ERP (non-da, H&V) at an antenna height above ground of 23 meters. For a worst case estimation at 2 meters above ground level at the base of the tower the RFR is no more than **8.8%** of the general population/uncontrolled MPE limit.

There are no other broadcast facilities located at the site.

Educational Media Foundation will fully cooperate with future site users to temporarily reduce power or cease broadcasting, as necessary, to protect workers and others having access to the site from excessive levels of RF Radiation.
